Welcome

What it is, who it suits, its grades and the ten things to know first

1.6

GPA, above 2 of the 61 other email verification and deliverability tools we grade

Validity Engage, the product the directory lists as Validity Everest, is an enterprise email platform for brands that send at scale. Its deliverability module covers inbox placement testing, Sender Score monitoring, blocklist and authentication checks, and pre-send checks. It is sold through sales, with no public price list.

To get you started, here are **7 things to know about Validity Engage**, taken from its own pages and our grades.

> **No price is published, the vendor's pages now call it Validity Engage, and a demo is the only way in.**
>
> From our report card of Validity Engage

1 **Best for inbox placement and sender reputation for big senders**

Validity's platform tests where your email lands and watches sender reputation, blocklists and authentication.

2 **It runs on Web**

Web.

3 **Inbox placement testing**

Shows where a campaign lands across major mailbox providers, using the Validity Intelligence Network, with results split by IP and domain.

4 **Sender reputation monitoring**

Tracks Sender Score across IPs and domains so a drop can be seen before it turns into a placement problem.

5 **Authentication monitoring**

Checks SPF, DKIM and DMARC configuration and alignment across sending domains and flags when something breaks.

6 **A 1.6 GPA, above 2 of 61**

That is against the other email verification and deliverability tools we grade, on value, the free plan, features, ease of use and platforms.

7 **Keep it**

To replace Validity Engage you would be making newsletters sent to thousands of people that still reach the inbox. That is not a weekend's work, with an AI app builder or without one.

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No plan prices were found, so there's nothing to set against the category's $23 middle.
Free plan and trial	F	No self-serve sign-up, free plan or trial on the pages we read.
Features	C	Inbox placement tests, reputation, authentication and blocklist monitoring and pre-send checks. It's enterprise-aimed, and the listing's name no longer matches the vendor's.
Ease of use	C	No store rating on record. Getting started means a demo and onboarding.
Platforms and integrations	C	Web only, with no integrations listed on the pages we read.

Grade point average — Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Validity Engage is for

- ✓ Fits if you send large volumes and need to see inbox placement
- ✓ Works for brands with a team watching sender reputation

Who it is not for

- ✕ Not for you if you want to buy online, as pricing is built to fit through sales
- ✕ Skip it if you want a free plan or trial, as none was found
- ✕ Watch out: the directory name is Validity Everest, but the vendor's pages call it Validity Engage
- ✕ Pricey if you are a small sender, as it is aimed at enterprise sending programs and priced through sales

Good to know

Good for

- ✓ Large senders that need inbox placement data by mailbox provider
- ✓ Teams that want reputation, blocklist and authentication checks in one place
- ✓ Enterprise email programs buying through a sales process

Worth knowing

- ⓘ Pricing is built to fit through sales; no plan prices were found on the pages read.
- ⓘ The directory name is Validity Everest, but the vendor's pages now call the platform Validity Engage.
- ⓘ Aimed at enterprise programs; a demo is the listed way to get started.
- ⓘ No self-serve sign-up or free plan was found on the pages read.

What it costs

Every plan, the free plan, ways to pay less and how prices have moved

Validity Engage's current pricing could not be confirmed from its own site.

> **No self-serve sign-up, free plan or trial on the pages we read.**

What it does

Its main features, where it runs, what it works with and who makes it

1

Place it runs: Web

Inbox placement and sender reputation monitoring for brands. Here is what it does, as its own site describes it, and what it covers: email campaigns, dMARC.

> **Inbox placement tests, reputation, authentication and blocklist monitoring and pre-send checks.**
>
> From our grade for features

Inbox placement testing

Shows where a campaign lands across major mailbox providers, using the Validity Intelligence Network, with results split by IP and domain.

Sender reputation monitoring

Tracks Sender Score across IPs and domains so a drop can be seen before it turns into a placement problem.

Authentication monitoring

Checks SPF, DKIM and DMARC configuration and alignment across sending domains and flags when something breaks.

Blocklist monitoring

Alerts when an IP or domain is listed on a blocklist and gives guidance on the trigger and on getting removed.

Pre-send deliverability check

Runs before a campaign goes out and surfaces spam trap, reputation and authentication risks.

Provider-specific signals

Breaks placement and throttling signals out by mailbox provider such as Gmail, Yahoo and Office 365.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

2/61

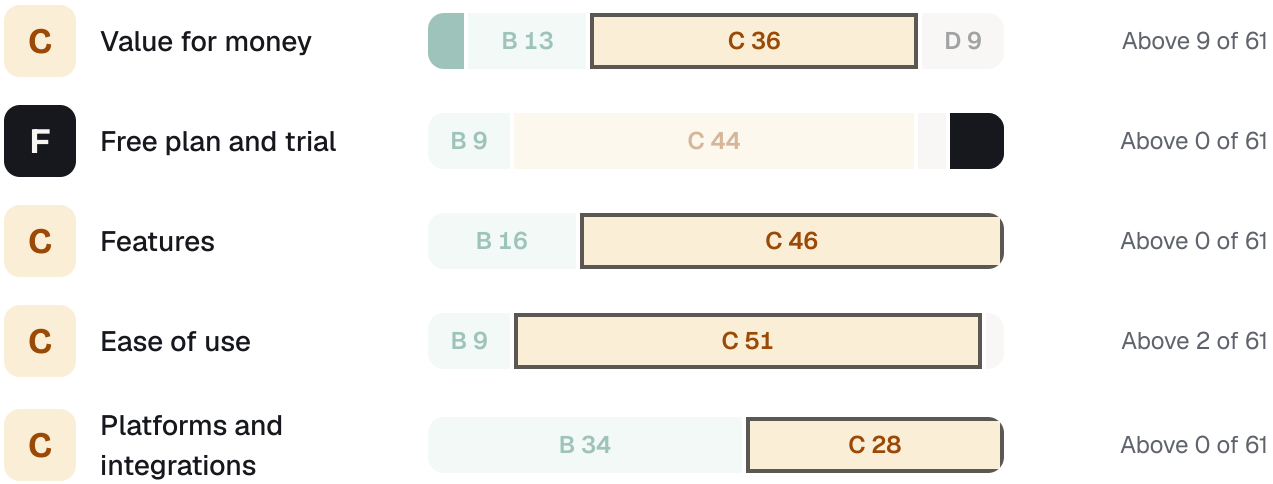

Other email verification and deliverability tools it is graded above

Validity Engage's GPA of 1.6 is higher than 2 of the 61 other email verification and deliverability tools we grade, and level with 1.

It stands best on value for money (C, above 9 of 61) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 62 email verification and deliverability tools we grade, cut by the letter each got. Validity Engage's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Validity Engage you would be making newsletters sent to thousands of people that still reach the inbox. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 58 of the 61 other email verification and deliverability tools grade higher.

What you could not

- ✕ Newsletters sent to thousands of people that still reach the inbox.
- ✕ Reading the reports inbox providers send about your domain.

What this rests on. Validity Engage's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
