23/79

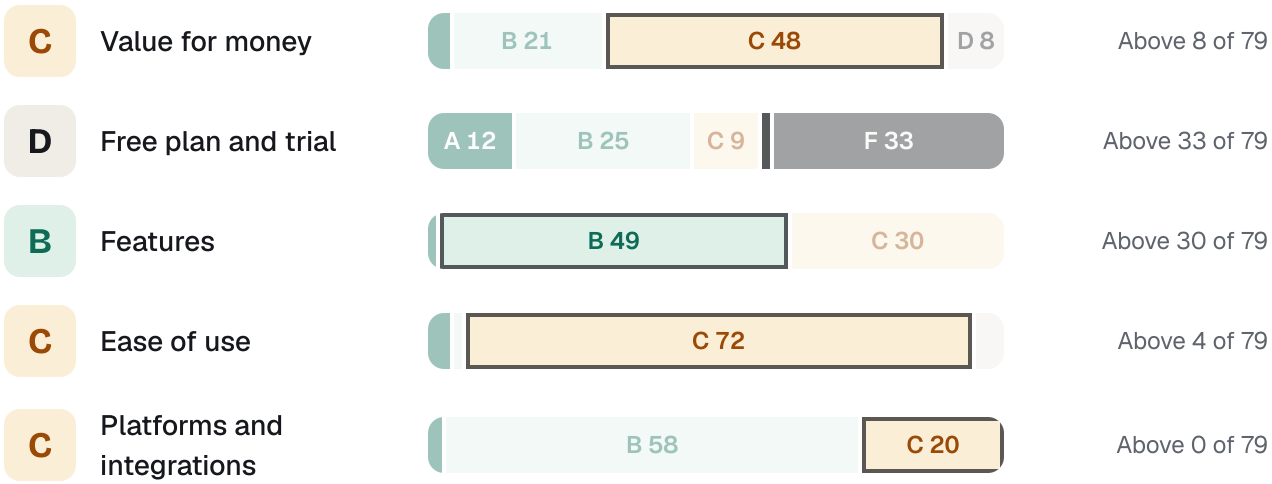

Other event ticketing platforms it is graded above

Veezi's GPA of 2.0 is higher than 23 of the 79 other event ticketing platforms we grade, and level with 12.

It stands best on features (B, above 30 of 79) and worst on free plan and trial (D, above 33).

Each grade against the category

Every bar is all 80 event ticketing platforms we grade, cut by the letter each got. Veezi's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Veezi you could make: inventory and reports. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 44 of the 79 other event ticketing platforms grade higher.

What you could make

- Inventory and reports: an app builder makes these well.

What you could not

- Selling tickets and checking them at the door.
- Clocking in from a phone, checked against where and when.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Veezi's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
