- ✗ Tight if you make many images: 50 credits a month won't go far
- ✗ Watch out: premium models and commercial use start at $9.99 a month
- ✗ Not for you if you want phone or desktop apps, as it's browser only
- ✗ Watch out: yearly prices are advertised as 2 months free, but weren't read

Keep it

It costs $119.88 a year.

What you could not

- ✕ An image model, which you can rent by the picture but not make.
- ✕ A video model, which you can rent by the second but not make.

- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Vheer's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
