PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

120/133

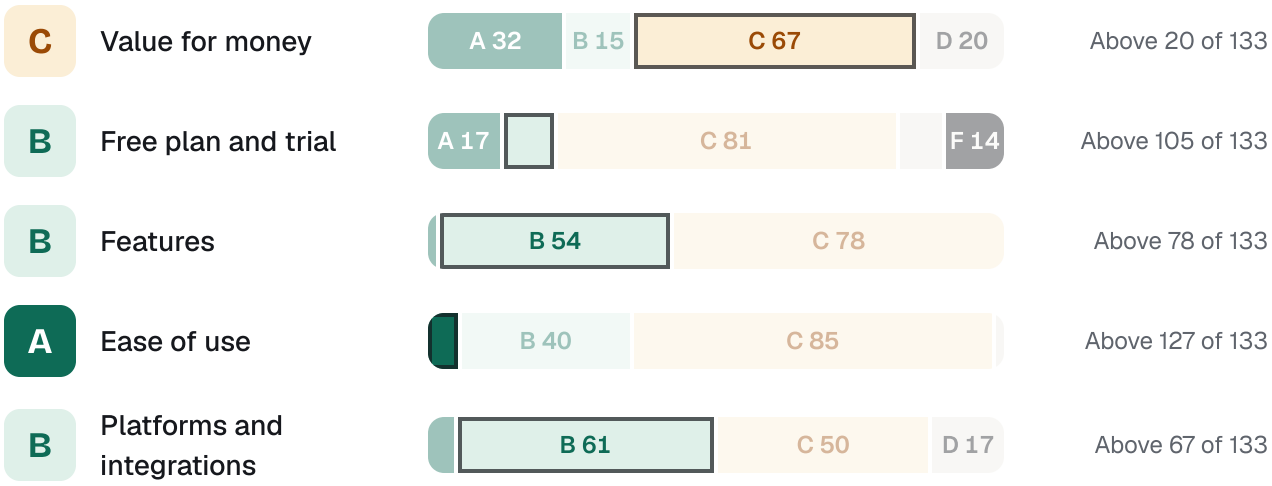

Other screen recording and video tools it is graded above

VN Video Editor's GPA of 3.0 is higher than 120 of the 133 other screen recording and video tools we grade, and level with 8.

It stands best on ease of use (A, above 127 of 133) and worst on value for money (C, above 20).

Each grade against the category

Every bar is all 134 screen recording and video tools we grade, cut by the letter each got. VN Video Editor's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace VN Video Editor you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 3.0 is higher than 120 of the 133 other screen recording and video tools we grade.

What you could make

- Templates: an app builder makes this well.

What you could not

- A video editor.
- A voice model, which you can rent by the minute but not make.
- Speech turned into text you can trust.
- Apps for macOS, iOS and Android that stay in step with each other.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. VN Video Editor's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
