PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

30/72

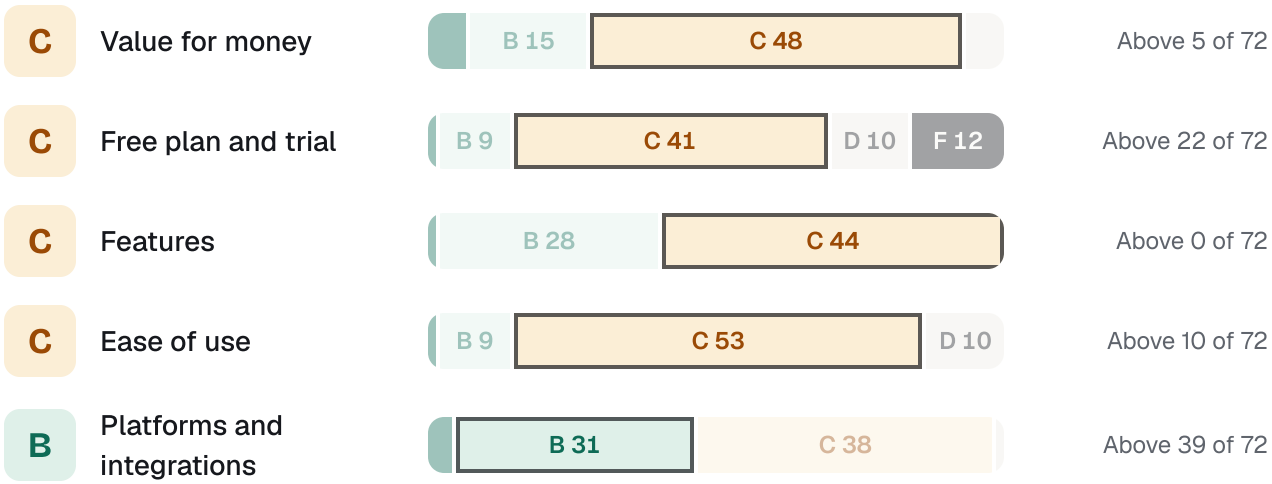

Other AI voice generators it is graded above

Voiseed's GPA of 2.2 is higher than 30 of the 72 other AI voice generators we grade, and level with 16.

It stands best on platforms and integrations (B, above 39 of 72) and worst on features (C, above 0).

Each grade against the category

Every bar is all 73 AI voice generators we grade, cut by the letter each got. Voiseed's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Voiseed you would be making a voice model, which you can rent by the minute but not make. That is not a weekend's work, with an AI app builder or without one.

What you could not

- ✕ A voice model, which you can rent by the minute but not make.
- ✕ A voice model trained on your recordings.
- ✕ It plugs into other products, memoQ and Blackbird.io among them, and has an API.
- ✕ What a company asks for before it lets staff use something: roles and permissions.

What this rests on. Voiseed's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
