PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

6/87

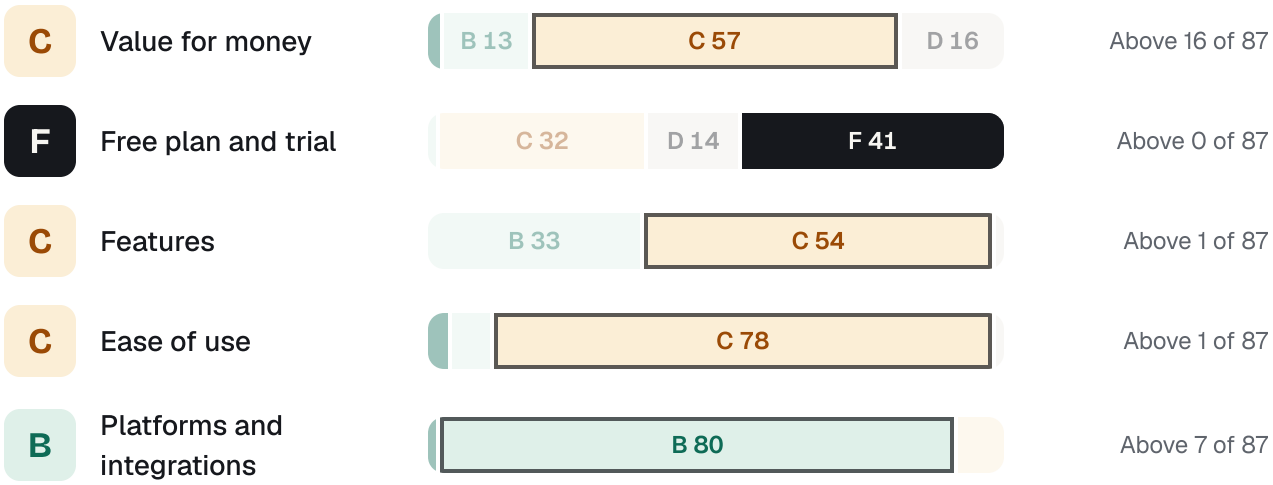

Other field service apps it is graded above

Vonigo's GPA of 1.8 is higher than 6 of the 87 other field service apps we grade, and level with 24.

It stands best on platforms and integrations (B, above 7 of 87) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 88 field service apps we grade, cut by the letter each got. Vonigo's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Vonigo you could make: job scheduling, quotes and estimates, invoicing, appointment booking and reports. What surrounds it you could not. The 1 things listed below take a company, not a weekend.

That makes this kind of software worth paying for, not this one in particular: 57 of the 87 other field service apps grade higher.

What you could make

- Job scheduling, quotes and estimates, invoicing, appointment booking and reports: an app builder makes these well.

What you could not

- An API that other software can build on.

What this rests on. Vonigo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
