Who Vozo is for

- ✓ Fits if you translate videos into several languages and want lip sync
- ✓ Makes sense if a team needs seats and bulk upload

Who it is not for

- ✕ Not for you if you want a lasting free plan, since 20 points expire after 7 days
- ✕ Pricey if you are one person: $29 a month is where the dearest tenth starts
- ✕ Watch out: point packs only work during a subscription and expire after 60 days
- ✕ Watch out: the same points buy about 50 minutes of dubbing but only about 15 of lip sync

Good to know

Good for

- ✓ Creators translating videos into many languages
- ✓ Teams that need seats and bulk upload for localization
- ✓ Anyone who wants dubbing, subtitles and lip sync in one place

Worth knowing

- ⓘ The Free plan gives 20 points, which the page equates to about 6 minutes of dubbing; the gift points for new users expire after 7 days.
- ⓘ Dubbing minutes are approximate: the same points buy about 15 minutes of lip sync on Creator.
- ⓘ Point packs for extra usage can only be used while a subscription is active and expire after 60 days.
- ⓘ Studio XL (1,500 points, 6 seats) and XXL (4,000 points, 10 seats) are sold too, but their prices could not be read, so they are not listed as plans.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

2/43

Other AI voice generators it is graded above

Vozo's GPA of 1.8 is higher than 2 of the 43 other AI voice generators we grade, and level with 5.

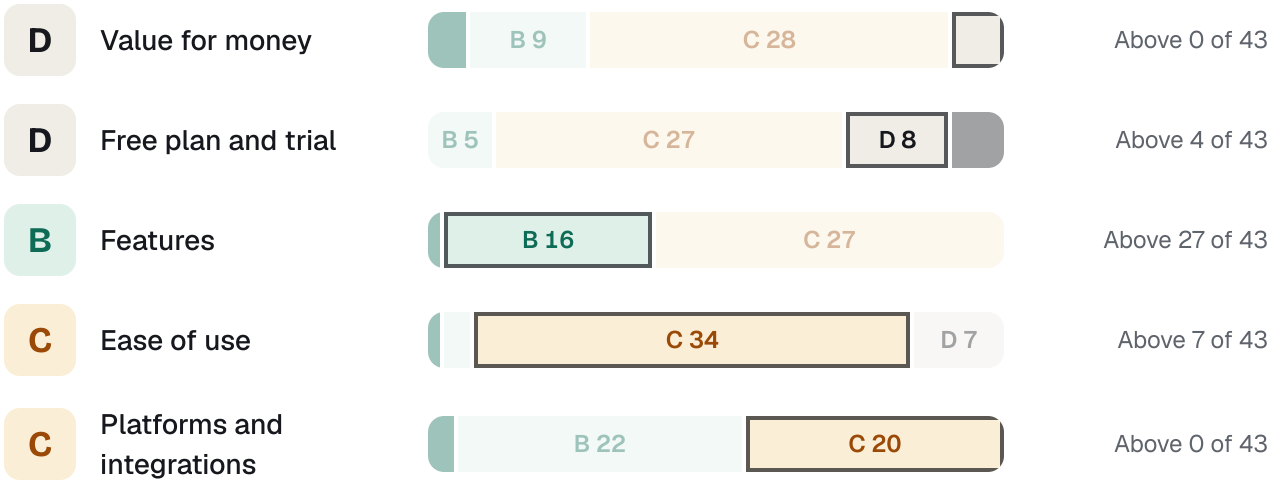

It stands best on features (B, above 27 of 43) and worst on value for money (D, above 0).

Its paid plans start at $29 a month, against a middle price of $10 for the category: 30 of the 33 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 7 tools score higher and cost less.

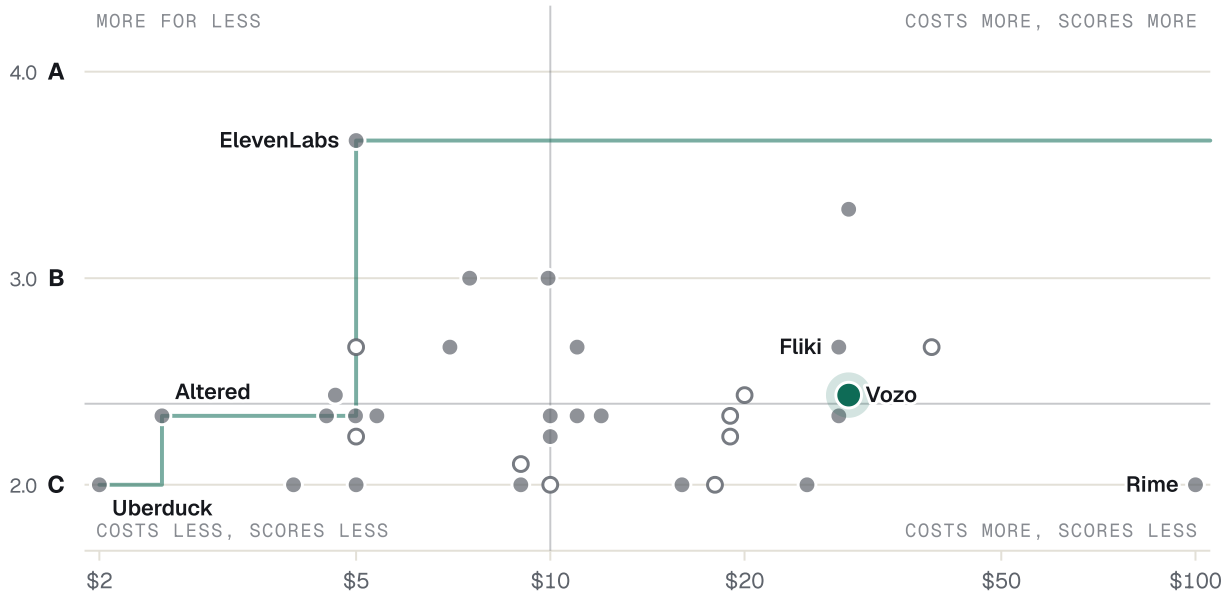

Each grade against the category

Every bar is all 44 AI voice generators we grade, cut by the letter each got. Vozo's own letter is outlined.

Price against what you get

Each dot is one of 34 AI voice generators. Further left costs less; higher up scores better on features, ease of use and platforms. Vozo is the marked dot.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Vozo you would be making a voice model, which you can rent by the minute but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 36 of the 43 other AI voice generators grade higher. It costs $348 a year.

What you could not

- ✕ A voice model, which you can rent by the minute but not make.
- ✕ A voice model trained on your recordings.

- ✕ A video editor.
- ✕ An API that other software can build on.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Vozo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
