Welcome

What it is, who it suits, its grades and the ten things to know first

1.8

GPA, above 5 of the 47 other cold outreach tools we grade

Warmbox is an email warm-up service. It exchanges automated messages between your mailbox and a network of its own inboxes, opens and replies to them, and pulls warm-up mail out of spam, with the aim of building sender reputation. It connects to Gmail, Outlook and other providers, and includes DNS and blacklist checks and a deliverability dashboard.

To get you started, here are **8 things to know about Warmbox**, taken from its own pages and our grades.

> **You connect each mailbox and pick a warm-up profile, which is a bit of setup per inbox.**
>
> From our grade for ease of use

1 **Best for warming up a single cold-email inbox**

Warmbox sends warm-up traffic between mailboxes so a new sending address builds reputation.

2 **Paid plans start at $15 a month**

As its pricing page puts it: $15 per month for 1 inbox (the page's other billing toggle shows $19).

3 **It runs on Web**

Web.

4 **Automated warm-up traffic**

Sends and answers messages with a private inbox network, marks them as favorites and removes them from spam.

5 **Warm-up profiles**

Growth, flat or random volume patterns, a warm-up schedule and fully custom settings.

6 **Realistic content**

The page says replies are written to look human, using GPT-4 and a hybrid approach.

7 **A 1.8 GPA, above 5 of 47**

That is against the other cold outreach tools we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

To replace Warmbox you would be making a network of real inboxes that open and answer your emails. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for warming up a single cold-email inbox

Warmbox sends warm-up traffic between mailboxes so a new sending address builds reputation. It warms inboxes and nothing else, the vendor says results take 15 to 30 days, and anything bigger than a few inboxes means a custom plan.

TOOLGPA REPORT CARD	Warmbox	Graded Nov 12, 2026
SUBJECT	GRADE	COMMENT
Value for money	B	$15 a month for 1 inbox is inside the cheapest quarter of cold outreach tools ($25), but the 3-inbox plan is $69 and 6 inboxes is $139. The page's other billing toggle shows $19.
Free plan and trial	F	No free plan and no trial is listed. A free blacklist and DNS checker is the only free part.
Features	D	It warms inboxes with automated traffic, profiles and monitoring. It does not find leads or send campaigns, so it needs a sending tool next to it.
Ease of use	C	No store rating on record. You connect each mailbox and pick a warm-up profile, which is a bit of setup per inbox.
Platforms and integrations	B	Web only, but it works with Gmail, Google Workspace, Microsoft 365, Yahoo, SendGrid, Mailgun, Amazon SES and Zoho inboxes.
Grade point average		Weak, out of 4.0 **1.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Warmbox is for

- ✓ Fits if you send cold email from one or two new mailboxes and want a warm-up run in the background
- ✓ Works for agencies that connect many client inboxes and will ask for a custom plan

Who it is not for

- ✗ Skip it if you want a free try, because there is no trial or free plan
- ✗ Tight if you run more than 6 inboxes, as plans stop there and larger setups are custom
- ✗ Pricey if you add inboxes: $15 for 1 inbox becomes $69 for 3
- ✗ Watch out: the vendor says warm-up usually needs 15 to 30 days of uninterrupted running before results show
- ✗ Watch out: the pricing page doesn't say which billing period each of its two price sets applies to

Good to know

Good for

- ✓ Cold emailers warming a handful of new mailboxes
- ✓ Agencies that need several client accounts in one place
- ✓ Senders using providers beyond Gmail, including SMTP mailboxes

Worth knowing

- ⓘ The pricing page does not state which billing period each of its two price sets applies to; the default view shows $15 for Solo and the other toggle shows $19.
- ⓘ Plans are sized by the number of inboxes (1, 3 or 6) and by emails a day, so larger setups need a custom plan.
- ⓘ The vendor says warm-up usually takes 15 to 30 days of uninterrupted warming before results show.
- ⓘ It warms mailboxes only; it does not send campaigns or find leads.

Where it stands

Its grades against its category, and whether to keep it or make your own

5/47

Other cold outreach tools it is graded above

Warmbox's GPA of 1.8 is higher than 5 of the 47 other cold outreach tools we grade, and level with 3.

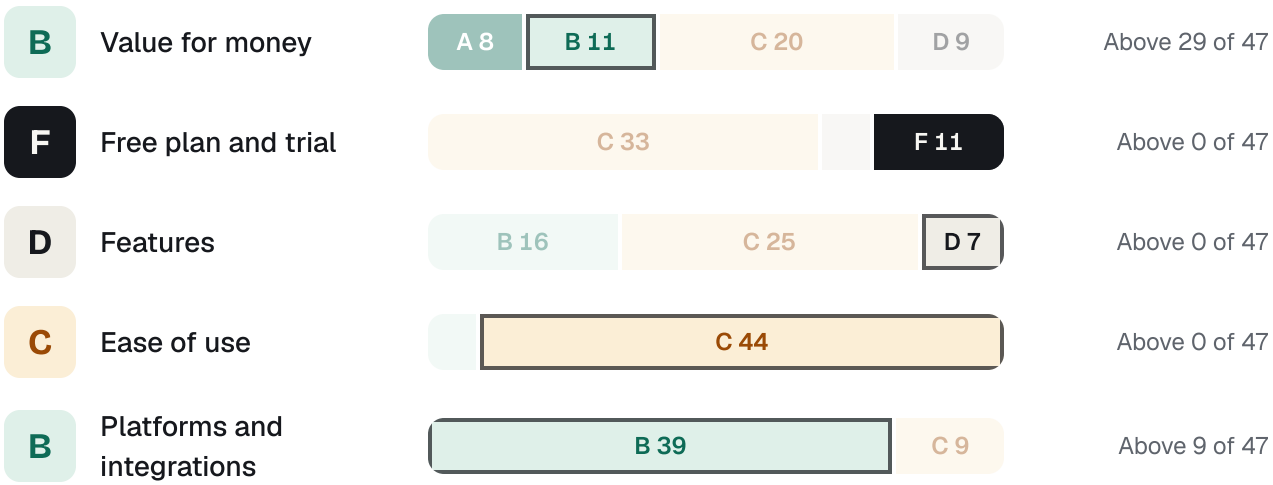

It stands best on value for money (B, above 29 of 47) and worst on free plan and trial (F, above 0).

Its paid plans start at $15 a month, against a middle price of $39 for the category: 5 of the 43 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 1 tool scores higher and costs less.

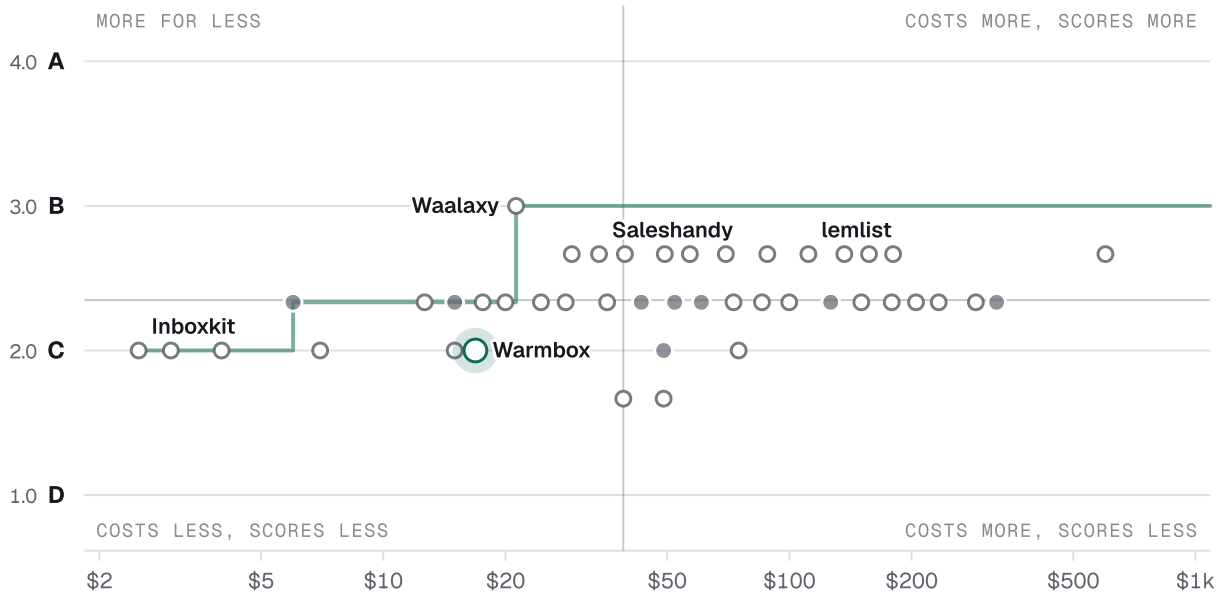

Each grade against the category

Every bar is all 48 cold outreach tools we grade, cut by the letter each got. Warmbox's own letter is outlined.

Price against what you get

Each dot is one of 44 cold outreach tools. Further left costs less; higher up scores better on features, ease of use and platforms. Warmbox is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Warmbox you would be making a network of real inboxes that open and answer your emails. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 39 of the 47 other cold outreach tools grade higher. It costs $180 a year.

What you could make

- Reports: an app builder makes this well.

What you could not

- A network of real inboxes that open and answer your emails.

- ✕ It plugs into other products, Gmail, Google Workspace and Microsoft 365 among them.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Warmbox's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
