Welcome

What it is, who it suits, its grades and the ten things to know first

2.6

GPA, above 27 of the 66 other read-later and bookmark apps we grade

Weava is a research tool, mainly a Chrome extension, for highlighting websites and PDFs and adding notes. Highlights are organized into folders in a web dashboard and can be exported with citations. An iOS app is available, and a paid plan adds folder sharing.

To get you started, here are **9 things to know about Weava**, taken from its own pages and our grades.

> "
>
> **You install a Chrome extension and start highlighting, with little to set up.**
>
> From our grade for ease of use

1 **Best for highlighting web pages and PDFs, with folders**

Weava lets you highlight and annotate web pages and PDFs, sort them into folders and generate citations.

2 **Paid plans start at $3.99 a month**

As its pricing page puts it: $3.99 per month.

3 **There is a free plan**

Unlimited highlights and notes, sync across unlimited devices and 100 MB of storage.

4 **It runs on 2 platforms**

Web and iOS, with a browser extension too.

5 **Highlights on pages and PDFs**

Highlight text on any website or PDF and attach notes to each highlight.

6 **Folders**

Organize saved work in a dashboard; sub-folders need Premium.

7 **Automatic citations**

Generates citations in APA, MLA, Chicago and Harvard styles.

8 **A 2.6 GPA, above 27 of 66**

That is against the other read-later and bookmark apps we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Weava you would be making a library of papers and sources to search. That is not a weekend's work, with an AI app builder or without one.

Who Weava is for

- ✓ Fits if you research for school or work and want highlights and citations in one place
- ✓ Works for someone on Chrome and iPhone

Who it is not for

- ✗ Skip it if you use another browser or an Android phone: the pages name only Chrome and iOS
- ✗ Tight if you save much: the free plan has 100 MB of storage
- ✗ Watch out: collaboration, sub-folders and saving images are Premium only
- ✗ Watch out: the page does not say whether $3.99 is monthly or yearly billing

Good to know

Good for

- ✓ Students and researchers collecting sources for papers
- ✓ People who want highlights from web pages and PDFs in one place

Worth knowing

- ⓘ The free plan has 100 MB of storage.
- ⓘ Collaboration, sub-folders, unlimited colors and saving images need Premium.
- ⓘ The page does not say whether $3.99 is for monthly or yearly billing; it says yearly billing is usually about 20% cheaper.
- ⓘ The homepage text offers a Chrome extension and an iOS app, and lists no other browser.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

27/66

Other read-later and bookmark apps it is graded above

Weava's GPA of 2.6 is higher than 27 of the 66 other read-later and bookmark apps we grade, and level with 9.

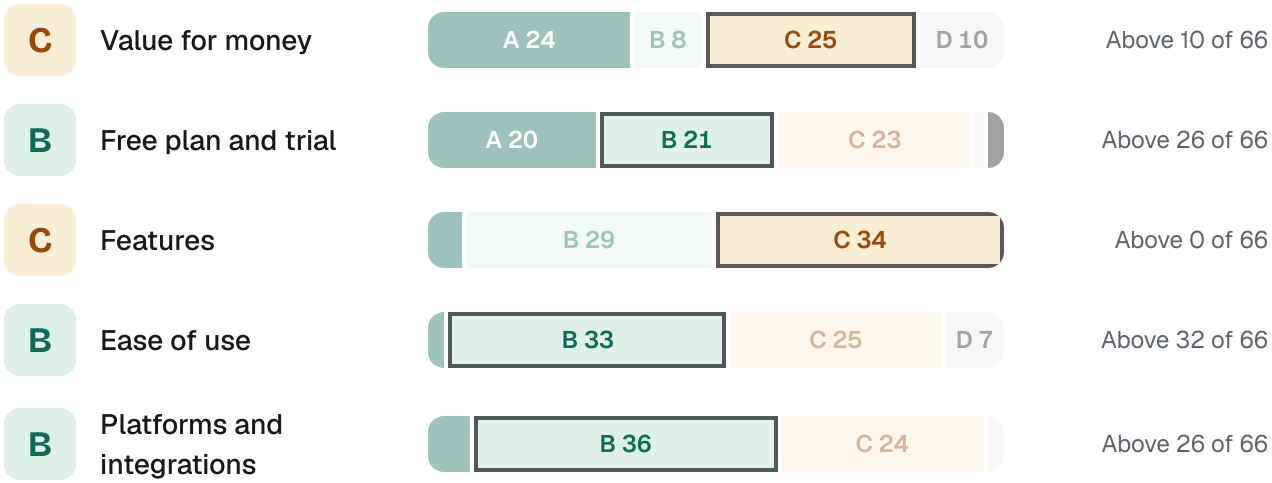

It stands best on ease of use (B, above 32 of 66) and worst on features (C, above 0).

Its paid plans start at $3.99 a month, against a middle price of $3.33 for the category: 20 of the 37 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 6 tools score higher and cost less.

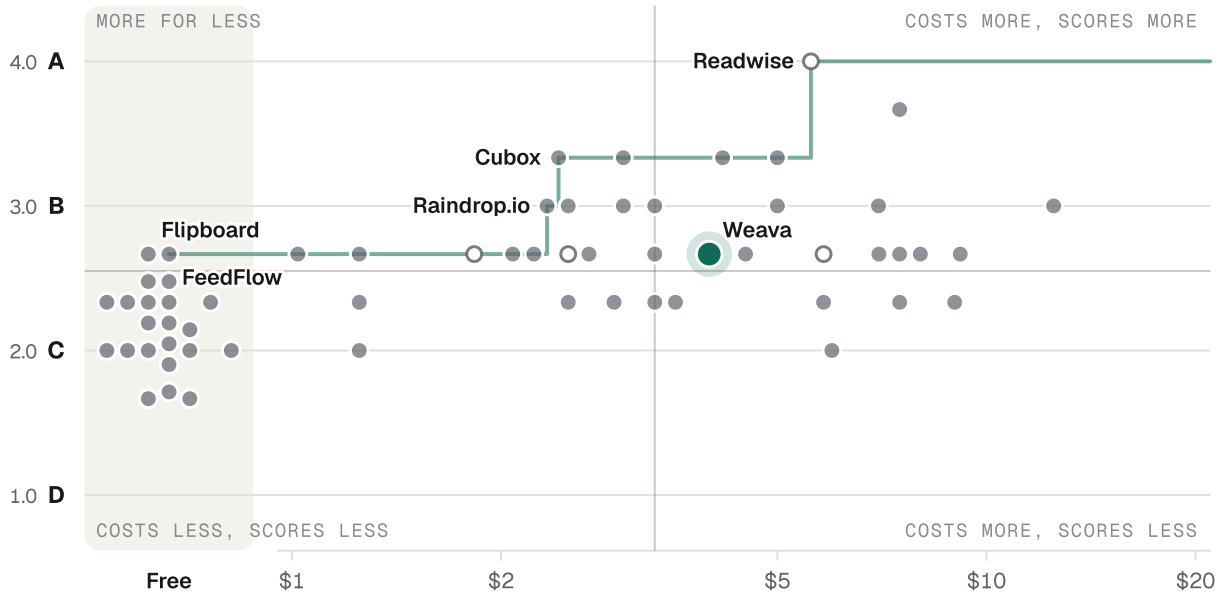

Each grade against the category

Every bar is all 67 read-later and bookmark apps we grade, cut by the letter each got. Weava's own letter is outlined.

Price against what you get

Each dot is one of 60 read-later and bookmark apps. Further left costs less; higher up scores better on features, ease of use and platforms. Weava is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Weava you would be making a library of papers and sources to search. That is not a weekend's work, with an AI app builder or without one.

It costs $47.88 a year.

What you could make

- Highlights and web clipper: an app builder makes these well.

What you could not

- A library of papers and sources to search.
- Citation records for millions of papers.

- A real app for iOS. Something home-made would be a web page.

What this rests on. Weava's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
