To get you started, here are **8 things to know about Web Highlights**, taken from its own pages and our grades.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

12/66

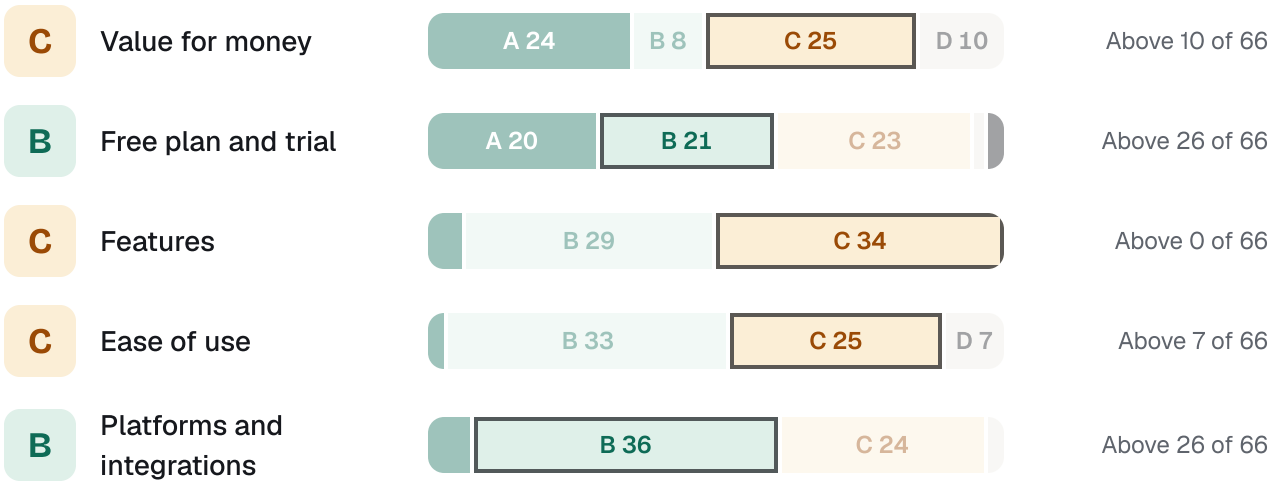

Other read-later and bookmark apps it is graded above

Web Highlights's GPA of 2.4 is higher than 12 of the 66 other read-later and bookmark apps we grade, and level with 14.

It stands best on free plan and trial (B, above 26 of 66) and worst on features (C, above 0).

Each grade against the category

Every bar is all 67 read-later and bookmark apps we grade, cut by the letter each got. Web Highlights's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Your call

A read-later list at its plainest is saved links with tags.

You could make the core of Web Highlights for yourself: highlights, web clipper, bookmarks, read later and notes. What you would give up is listed below. Whether that is worth the price is your call.

What you could make

- Highlights, web clipper, bookmarks, read later and notes: an app builder makes these well.

What you could not

- A real app for iOS and Android. Something home-made would be a web page.

What this rests on. Web Highlights's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
