Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 17 of the 55 other website and landing page builders we grade

Webador is a drag-and-drop builder for small business and personal sites, with an AI step that drafts a first version from a one-sentence description. A free plan runs on a Webador address, and paid plans add a custom domain, a mailbox and, from Pro, an online store. Plans are priced per month but paid yearly.

To get you started, here are **9 things to know about Webador**, taken from its own pages and our grades.

Webador is a drag-and-drop site builder that drafts a first version from a sentence about your business.

2 **Paid plans start at $6 a month**

Free plan with essential features, hosting and no custom domain name; the page says it is for trying out the builder.

4 **It runs on Web**

Web.

5 AI website generator

You describe the business in a sentence and the AI builds a first version with pages, text and photos, which stays editable in the drag-and-drop editor.

6 Online store

Pro includes a store with 10 products and Business has unlimited products. The pricing page lists digital products, services and 0% commission.

7 Domain and mailbox

Paid plans include a domain free for the first year, then $22.50 a year, and a personal mailbox tied to that domain name.

8 A 2.2 GPA, above 17 of 55

That is against the other website and landing page builders we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace Webador you would be making checkout, card payments and sales tax handled for you. That is not a weekend's work, with an AI app builder or without one.

Best for a small personal site with an AI first draft

Free plan and trial	C	A free plan exists, but it is for trying out the builder and has no custom domain. No trial is listed.
Features	C	AI first draft, 50-plus templates and a store. The listing's gaps keep it a C: Lite shows ads, the store holds 10 products on Pro, and unlimited products need Business at $21.
Ease of use	C	No store rating on record. You pick a template or an AI draft and then edit it yourself.
Platforms and integrations	C	Web only. The listed connections are Google Analytics, Google Business Profile and Google Search Console, nothing else.

Grade point average — Fair, out of 4.0 **2.2**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

17/55

Other website and landing page builders it is graded above

Webador's GPA of 2.2 is higher than 17 of the 55 other website and landing page builders we grade, and level with 16.

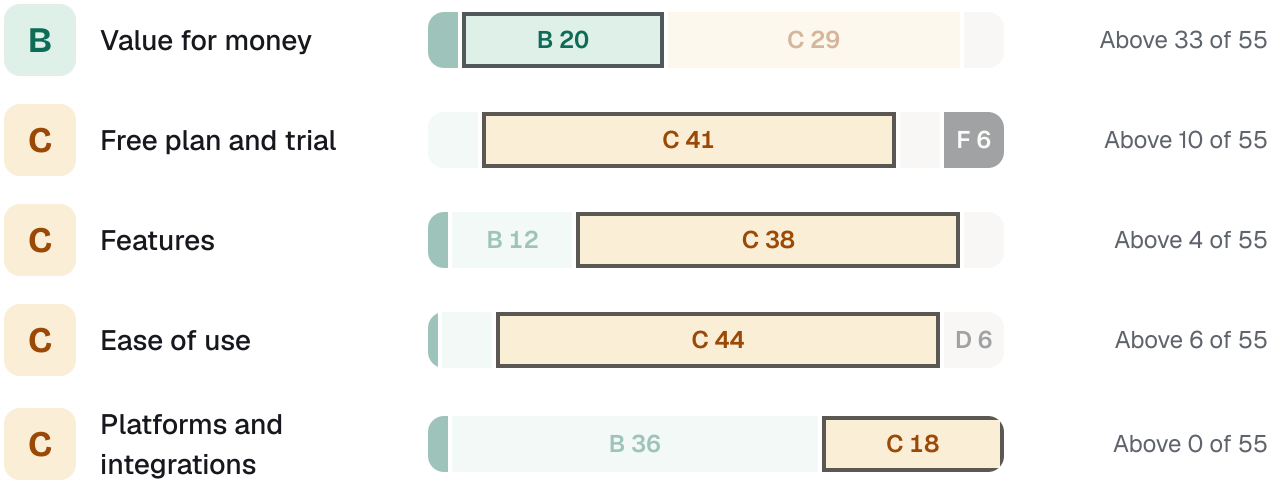

It stands best on value for money (B, above 33 of 55) and worst on platforms and integrations (C, above 0).

Its paid plans start at $6 a month, against a middle price of $12.42 for the category: 8 of the 52 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 5 tools score higher and cost less.

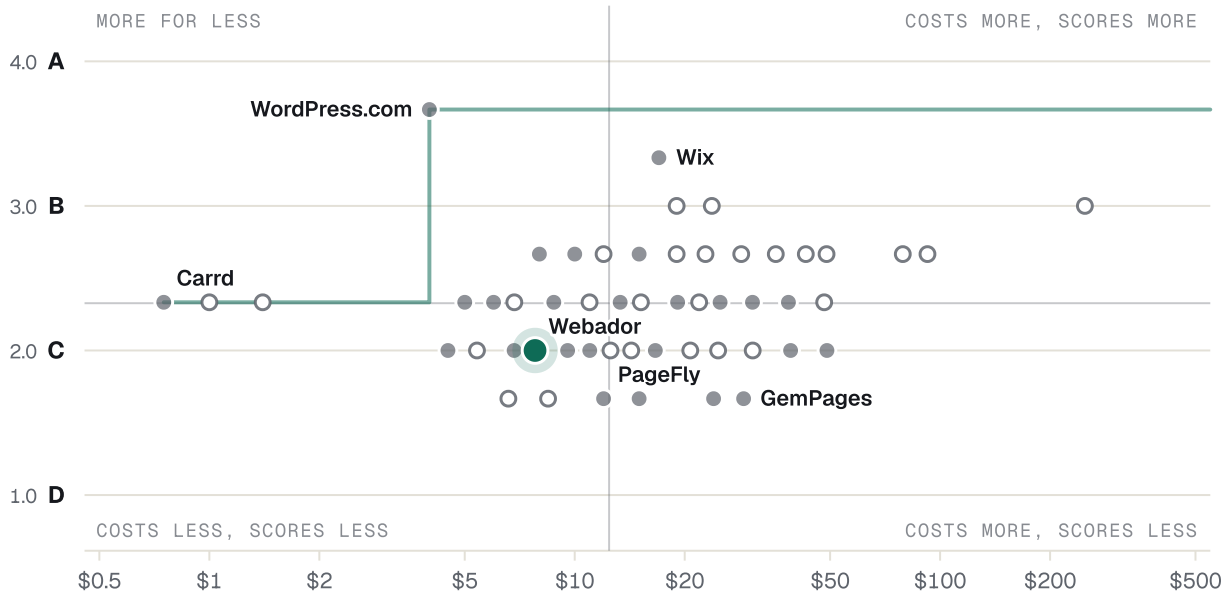

Each grade against the category

Every bar is all 56 website and landing page builders we grade, cut by the letter each got. Webador's own letter is outlined.

Price against what you get

Each dot is one of 53 website and landing page builders. Further left costs less; higher up scores better on features, ease of use and platforms. Webador is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Webador you would be making checkout, card payments and sales tax handled for you. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 22 of the 55 other website and landing page builders grade higher. It costs $72 a year.

What you could make

- Templates and forms: an app builder makes these well.

What you could not

- Checkout, card payments and sales tax handled for you.

	✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Webador's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
