Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 26 of the 60 other webinar and live streaming tools we grade

WebinarKit runs automated (evergreen) webinars and challenge-style multi-day events, with registration pages, a watch room, email and SMS follow-ups and chat. It also has an AI tool that drafts a sales script and slide deck from a few details about the offer. Live webinars are sold separately as WebinarKit Live, and a white-label edition is a third product.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace WebinarKit you would be making live video to hundreds of people at once. That is not a weekend's work, with an AI app builder or without one.

It costs $588 a year.

What you could not

- ✕ Live video to hundreds of people at once.
- ✕ Newsletters sent to thousands of people that still reach the inbox.

- ✕ Email sent in volume that still reaches the inbox.
- ✕ It plugs into other products, Zapier, Pabbly and HighLevel among them, and has an API.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. WebinarKit's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
