2.2

GPA, above 40 of the 104 other website and landing page builders we grade

Webydo is a visual website builder aimed at freelancers, design studios and small businesses. An AI builder drafts pages that can then be edited in a design studio, and the higher plans add white-label branding for client work. A built-in CRM with quotes and invoicing is sold with the Business plan and as an add-on.

Who Webydo is for

- ✓ Fits if you build sites for several clients and want one login for CRM and invoicing
- ✓ Works for small shops that want a site and a simple contact list together

Who it is not for

- ✗ Tight if you plan to publish for free, because a live site needs a paid plan
- ✗ Pricey if you need white label: branding and added code start at Team, $150 a month billed yearly
- ✗ Watch out: the home page mentions a 5-day trial while the pricing page describes a free workspace, so the two pages disagree
- ✗ Watch out: Starter and Business cover 1 website each, and more sites need Pro at $75 a month
- ✗ Skip it if you want the bundles, as Grow and All-in-One are marked coming soon

Good to know

Good for

- ✓ Freelancers and small studios building sites for several clients

- ⓘ The homepage mentions a 5-day trial while the pricing page describes a free workspace with no time limit.
- ⓘ White-label branding and added code start at the Team plan ($150 a month billed yearly).
- ⓘ The Grow and All-in-One bundles are marked as coming soon.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Webydo you would be making a builder that other people can use without writing code. That is not a weekend's work, with an AI app builder or without one.

It costs $144 a year.

What you could make

- Invoicing and templates: an app builder makes these well.

What you could not

- A builder that other people can use without writing code.

- ✕ Checkout, card payments and sales tax handled for you.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Webydo's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
