PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

9/75

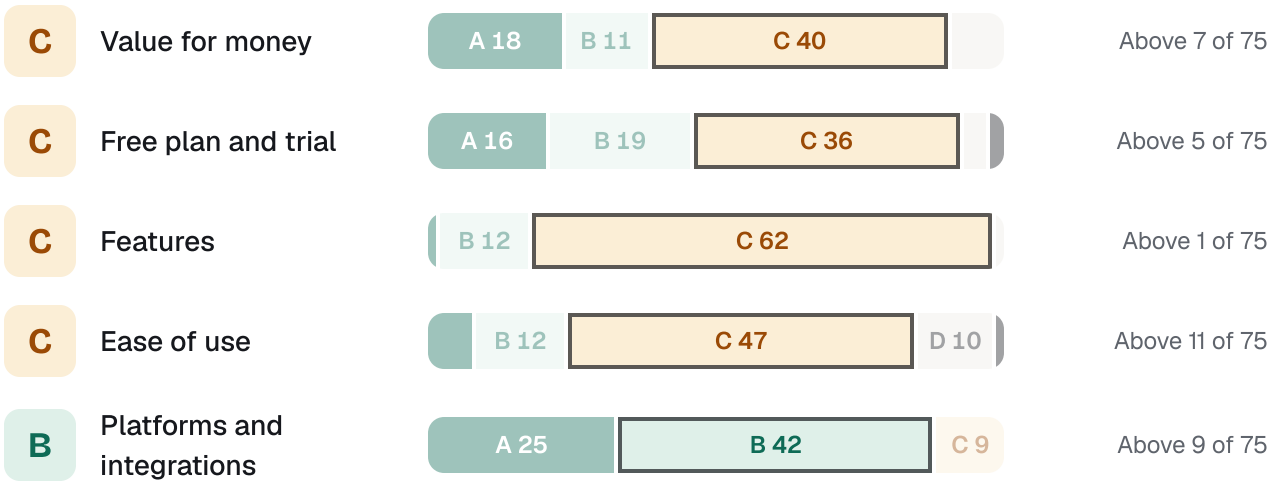

Other team communication apps it is graded above

WeCom's GPA of 2.2 is higher than 9 of the 75 other team communication apps we grade, and level with 19.

It stands best on platforms and integrations (B, above 9 of 75) and worst on features (C, above 1).

Each grade against the category

Every bar is all 76 team communication apps we grade, cut by the letter each got. WeCom's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace WeCom you would be making chat that a whole team counts on staying up. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 47 of the 75 other team communication apps grade higher.

What you could not

- Chat that a whole team counts on staying up.
- Video calls.
- Connections to other products, each kept working as those products change.
- Storing and serving files for other people.
- Apps for macOS, Windows, iOS and Android that stay in step with each other.
- What a company asks for before it lets staff use something: roles and permissions.

What this rests on. WeCom's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
