From our grade for platforms and integrations

Infinite canvas

Text, drawings, files, shapes, stacked cards and connectors share one boundless board, organized in a non-linear way.

Live sync and voice chat

Changes appear for every user at once, and voice chat lets a team talk through a board while working on it.

Several board styles

The same canvas serves as a whiteboard, sticky-note wall, mind map, kanban board and moodboard.

Templates

Featured templates include a lesson plan, an action plan and a pros and cons list.

No limits on size

Weje's free-whiteboard page says there is no cap on team size, objects per board or boards per account.

What it works with

Its own pages name no integrations.

Where it stands

Its grades against its category, and whether to keep it or make your own

85/98

Other whiteboard and mind map tools it is graded above

Weje's GPA of 3.0 is higher than 85 of the 98 other whiteboard and mind map tools we grade, and level with 10.

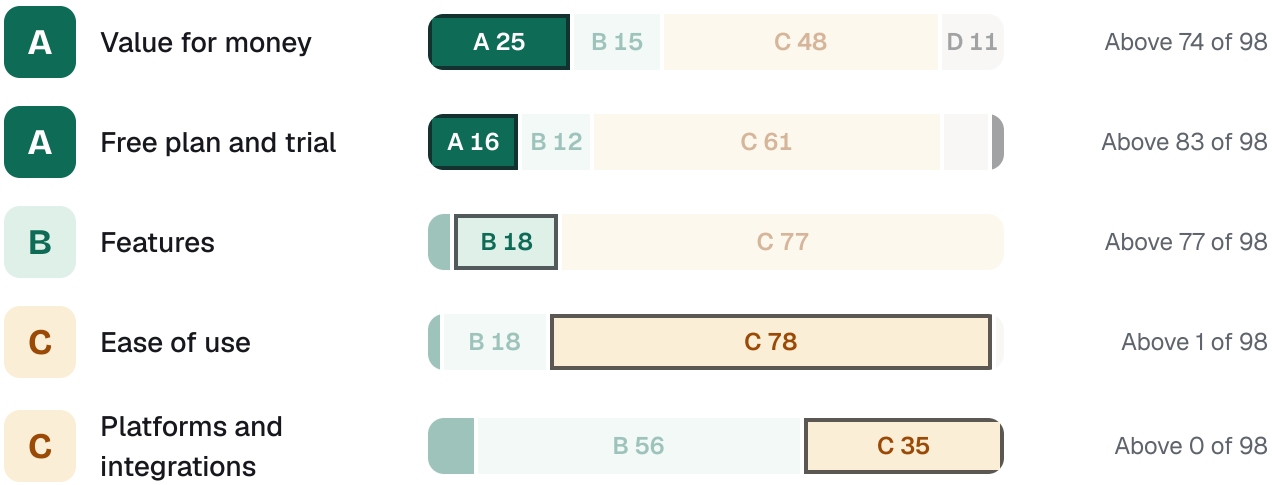

It stands best on free plan and trial (A, above 83 of 98) and worst on platforms and integrations (C, above 0).

Weje has no paid plan.

On features, ease of use and platforms it scores 2.3 out of 4. Nothing scores higher for less, though at least one tool matches that score at a lower price.

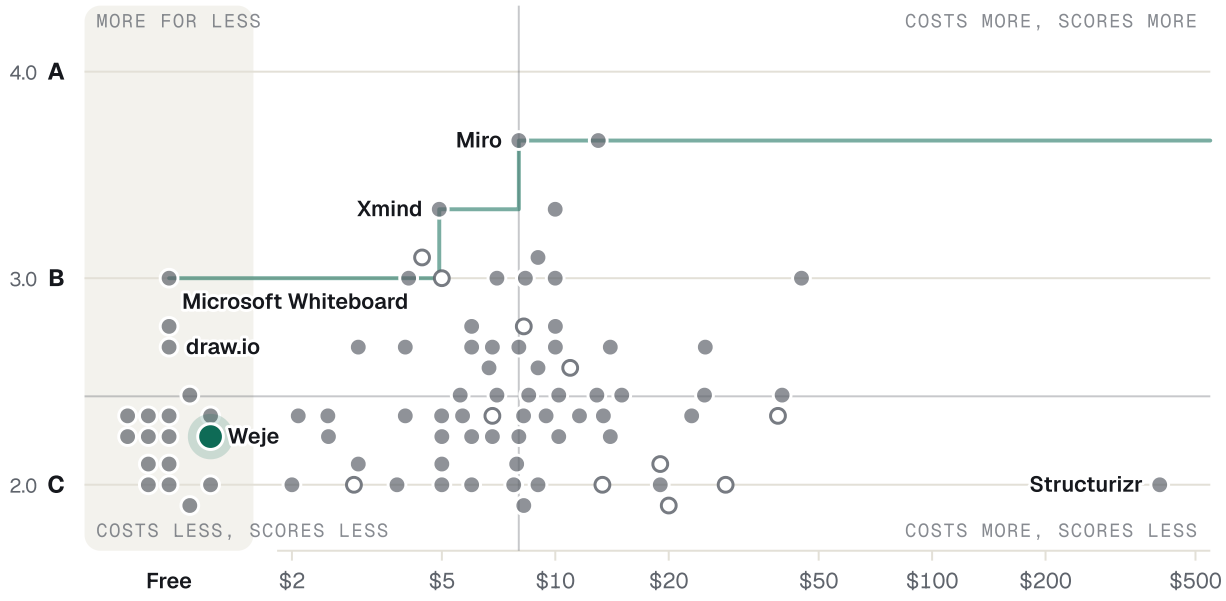

Each grade against the category

Every bar is all 99 whiteboard and mind map tools we grade, cut by the letter each got. Weje's own letter is outlined.

Price against what you get

Each dot is one of 88 whiteboard and mind map tools. Further left costs less; higher up scores better on features, ease of use and platforms. Weje is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

Weje is free, so making your own would save you nothing.

And it is not the kind of software a weekend replaces. It is one of the better ones too: its GPA of 3.0 is higher than 85 of the 98 other whiteboard and mind map tools we grade.

What you could make

- Mind mapping, kanban boards and templates: an app builder makes these well.

What you could not

- An endless canvas that stays smooth with hundreds of things on it.

- ✕ Several people working in it at the same moment.
- ✕ The depth: we grade its features B, which means it covers the whole job.

What this rests on. Weje's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
