Welcome to the Jungle

Graded Nov 13, 2026

SUBJECT	GRADE	COMMENT
Value for money	C	No price is published, so we can't set it against the $74 to $149 a month this category charges. That leaves it at C.
Free plan and trial	F	No free plan and no trial is listed; the site routes you to a demo. A demo request isn't a trial.
Features	C	Employer pages, job matching, sourcing and an ATS. Branding content packages are sold separately from the job packages.
Ease of use	C	No store rating on record, and the listing shows a company page and job packages to set up. That puts it at C.
Platforms and integrations	C	Web only, with no separate app on record. One kind of device, so C.

Grade point average Weak, out of 4.0 **1.6**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

6/101

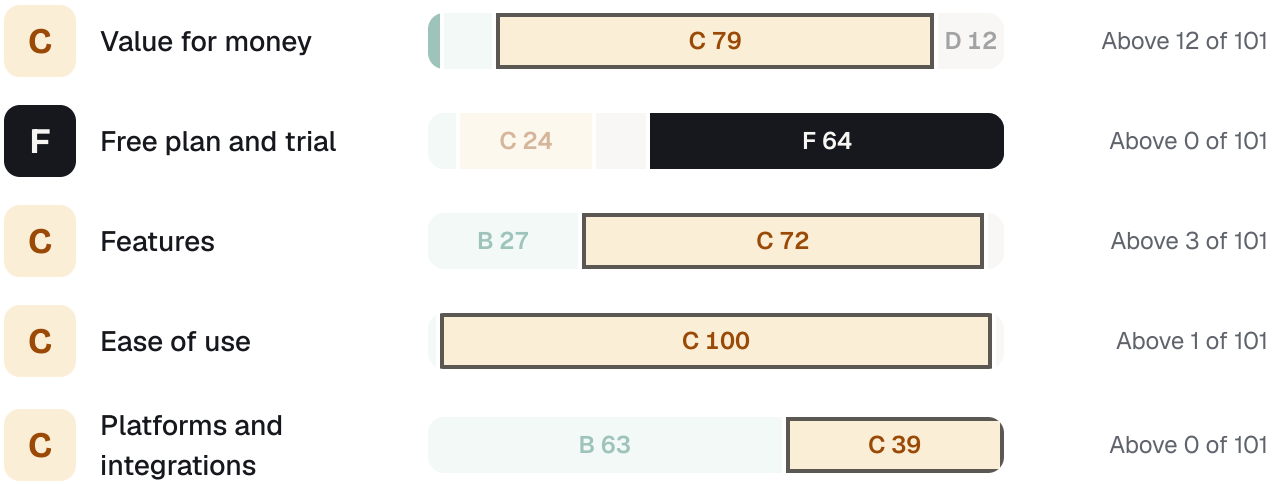

Other hiring and applicant tracking tools it is graded above

Welcome to the Jungle's GPA of 1.6 is higher than 6 of the 101 other hiring and applicant tracking tools we grade, and level with 23.

It stands best on value for money (C, above 12 of 101) and worst on free plan and trial (F, above 0).

Each grade against the category

Every bar is all 102 hiring and applicant tracking tools we grade, cut by the letter each got. Welcome to the Jungle's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Welcome to the Jungle you would be making jobs posted to dozens of job boards at once, which takes an agreement with each board. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 72 of the 101 other hiring and applicant tracking tools grade higher.

What you could make

- Applicant tracking: an app builder makes this well.

What you could not

- Jobs posted to dozens of job boards at once, which takes an agreement with each board.

What this rests on. Welcome to the Jungle's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
