Welcome

What it is, who it suits, its grades and the ten things to know first

2.8

GPA, above 31 of the 37 other QR code generators we grade

WiQRCode creates QR codes that let guests join a WiFi network by scanning, without typing the password. It needs no account, says the network details are processed locally in the browser and never uploaded, and downloads codes as PNG, SVG or PDF. A bulk tab makes many codes from a CSV file.

To get you started, here are **8 things to know about WiQRCode**, taken from its own pages and our grades.

> **It makes nothing else, and the codes are static, so changing the password means printing a new one.**
>
> From our report card of WiQRCode

1 **Best for a printable WiFi QR code**

WiQRCode makes WiFi QR codes, with no sign-up and no cost, and can build a batch from a CSV.

2 **It is free**

WiQRCode has no paid plan at all. Entirely free: no registration, no cost.

3 **It runs on Web**

Web.

4 **WiFi network codes**

Enter the network name, password and security type (WPA/WPA2, WEP or open), and mark hidden networks.

5 **Local processing**

The site says the details are never sent to its servers.

6 **Bulk from CSV**

Upload a CSV with network name, password, security type and hidden columns to make a code for each row.

7 **A 2.8 GPA, above 31 of 37**

That is against the other QR code generators we grade, on value, the free plan, features, ease of use and platforms.

8 **Keep it**

Value for money	A	Entirely free, with no registration, so it counts as free and substantial.
Free plan and trial	A	Free outright with no cap on record, bulk CSV creation and PNG, SVG and PDF downloads included.
Features	D	One narrow function: WiFi network codes only. No URL or contact codes, no tracking, no dynamic editing.
Ease of use	B	No rating on record, but you type a network name and password and get a code, with nothing to set up.
Platforms and integrations	C	Web only, with no account, no integrations and no API on record.
Grade point average		Good, out of 4.0 **2.8**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who WiQRCode is for

- ✓ Fits if you want to put a WiFi code on a cafe table or a guest room card
- ✓ Works for hosts who need a batch of codes from a CSV

Who it is not for

- ✗ Not for you if you want URL, contact or other code types, as it makes WiFi codes only
- ✗ Skip it if you change your WiFi password often, since the codes are static and need reprinting
- ✗ Too light for tracking scans, as there is no account or analytics

Good to know

Good for

- ✓ Restaurants, hotels and rental hosts who post a guest WiFi code
- ✓ Anyone who wants a WiFi QR code with no sign-up

Worth knowing

- ⓘ It makes WiFi codes only, not URL or vCard codes.
- ⓘ The codes are static: changing the WiFi password means generating and reprinting a new code.
- ⓘ There is no account, scan tracking or dynamic editing.
