Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Wisecut you would be making a video editor. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 92 of the 133 other screen recording and video tools grade higher. It costs $348 a year.

What you could not

- ✕ A video editor.
- ✕ Speech turned into text you can trust.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Wisecut's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
