Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace WodBoard you would be making email sent in volume that still reaches the inbox. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.4 is higher than 58 of the 85 other salon, spa and studio booking apps we grade. It costs $1,320 a year.

What you could make

- Class booking, appointment booking and reports: an app builder makes these well.

What you could not

- Email sent in volume that still reaches the inbox.
- A real app for iOS and Android. Something home-made would be a web page.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. WodBoard's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
