Welcome

What it is, who it suits, its grades and the ten things to know first

2.2

GPA, above 9 of the 75 other team communication apps we grade

WorkAdventure is a browser-based 2D virtual office and event space. People move an avatar around a map and a video, audio and text conversation opens automatically when they stand near each other. Teams use it as an always-open office, for events and for classrooms; the core is published on GitHub for self-hosting.

2 **Paid plans start at $9 a month for each person**

As its pricing page puts it: $9 per user / month, billed monthly.

3 **There is a free plan**

5 Proximity video chat

Walk an avatar next to someone to start an audio and video conversation without scheduling a call. Screen sharing, status and direct messages are on the free plan.

6 Speaker zones

Marked areas of the map where only the speaker is seen and heard, for talks and lectures. Attendees can raise a hand to be given the floor.

7 Map editor and templates

Build the space from map templates or edit zones, desks and rooms yourself. Personalized avatars and white label branding need a paid plan.

8 A 2.2 GPA, above 9 of 75

That is against the other team communication apps we grade, on value, the free plan, features, ease of use and platforms.

9 Keep it

To replace WorkAdventure you would be making chat that a whole team counts on staying up. That is not a weekend's work, with an AI app builder or without one.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

9/75

Other team communication apps it is graded above

WorkAdventure's GPA of 2.2 is higher than 9 of the 75 other team communication apps we grade, and level with 19.

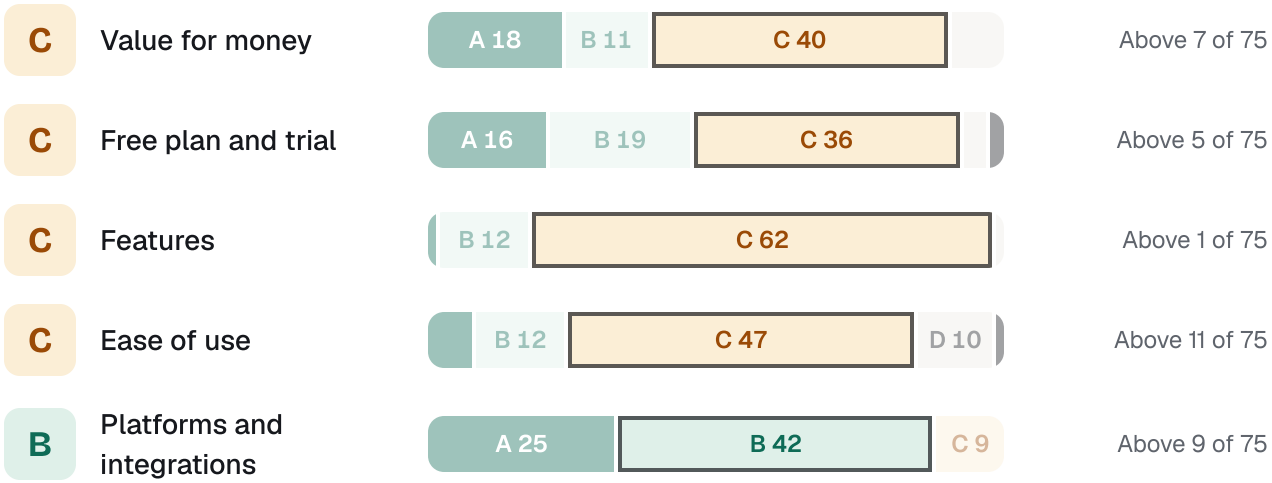

It stands best on platforms and integrations (B, above 9 of 75) and worst on features (C, above 1).

Its paid plans start at $9 a month for each person, against a middle price of $6.90 for the category: 32 of the 51 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 22 tools score higher and cost less.

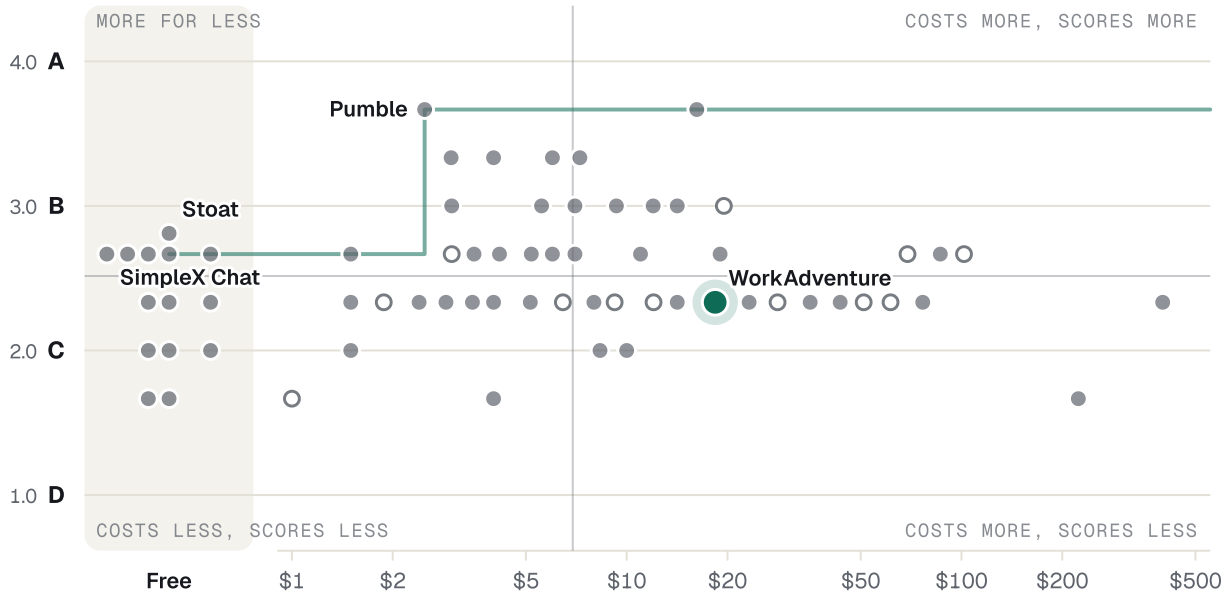

Each grade against the category

Every bar is all 76 team communication apps we grade, cut by the letter each got. WorkAdventure's own letter is outlined.

Price against what you get

Each dot is one of 66 team communication apps. Further left costs less; higher up scores better on features, ease of use and platforms. WorkAdventure is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace WorkAdventure you would be making chat that a whole team counts on staying up. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 47 of the 75 other team communication apps grade higher. It costs $108 a year.

What you could not

- ✕ Chat that a whole team counts on staying up.
- ✕ Video calls.

- ✕ Audio cleaned up live as you speak.
- ✕ It is priced for each person, which means accounts and billing for a team.
- ✕ It plugs into other products, Microsoft Teams, Outlook and Google Calendar among them.
- ✕ AI features, unless you pay a model provider for each request yourself.
- ✕ What a company asks for before it lets staff use something: single sign-on.

What this rests on. WorkAdventure's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
