Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 14 of the 149 other project management tools we grade

Workast is a task and project management tool that started inside Slack and also works with Webex and email. It captures tasks from chat, email, forms and calendars, and the vendor describes AI workflows that triage, assign and break down tasks. List, board, calendar and timeline views are available in a web app on paid plans.

To get you started, here are **8 things to know about Workast**, taken from its own pages and our grades.

Web.

4 Tasks in Slack and Webex

Tasks, checklists and reminders can be created and assigned from Slack or Webex; the Essential plan keeps task features inside Slack.

5 AI triage and subtasks

AI workflows sort incoming tasks by priority, type or project, assign them, and break tasks into subtasks.

6 Multi-channel task capture

To-dos are pulled in from Slack, email, forms and calendars, with a no-code builder for trigger, condition and action rules.

7 A 2.0 GPA, above 14 of 149

That is against the other project management tools we grade, on value, the free plan, features, ease of use and platforms.

8 Keep it

To replace Workast you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

Who Workast is for

- ✓ Fits if your team already talks all day in Slack
- ✓ Works for groups that want to turn messages into tasks

Who it is not for

- ✗ Skip it if you want prices up front, as plan prices were not shown on the page we read
- ✗ Tight if you pick Essential, which has 100 MB of storage and keeps task features in Slack only
- ✗ Watch out: the pricing FAQ says Workast does not offer refunds
- ✗ Not for you if you work outside Slack and Webex
- ✗ Too light for large firms, as Enterprise is aimed at 200+ users with several Slack workspaces

Good to know

Good for

- ✓ Teams that already do their daily chat in Slack or Webex
- ✓ Small businesses that want AI to route incoming requests
- ✓ Teams that capture tasks from email and forms

Worth knowing

- ⓘ The plan prices are not shown in the pricing page text, so pricing is recorded as unverified.
- ⓘ Plans are Essential, Standard, Pro and Enterprise; Essential has 100 MB of storage and keeps task features in Slack only.
- ⓘ The pricing FAQ says Workast does not offer refunds.
- ⓘ Enterprise is aimed at organizations of more than 200 users with multiple Slack workspaces or extra security needs.

Where it stands

Its grades against its category, and whether to keep it or make your own

14/149

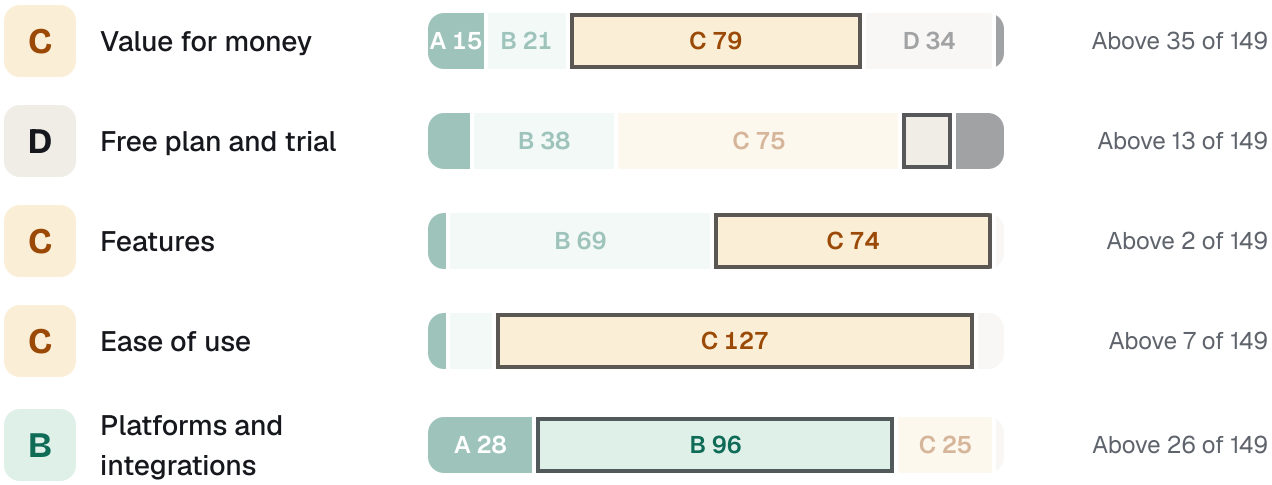

Other project management tools it is graded above

Workast's GPA of 2.0 is higher than 14 of the 149 other project management tools we grade, and level with 23.

It stands best on platforms and integrations (B, above 26 of 149) and worst on free plan and trial (D, above 13).

Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. Workast's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Workast you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 112 of the 149 other project management tools grade higher.

What you could make

- Tasks, kanban boards, forms and time tracking: an app builder makes these well.

What you could not

- Connections to other products, each kept working as those products change.
- AI features, unless you pay a model provider for each request yourself.

What this rests on. Workast's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
