To get you started, here are **9 things to know about WorkGuru**, taken from its own pages and our grades.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

68/87

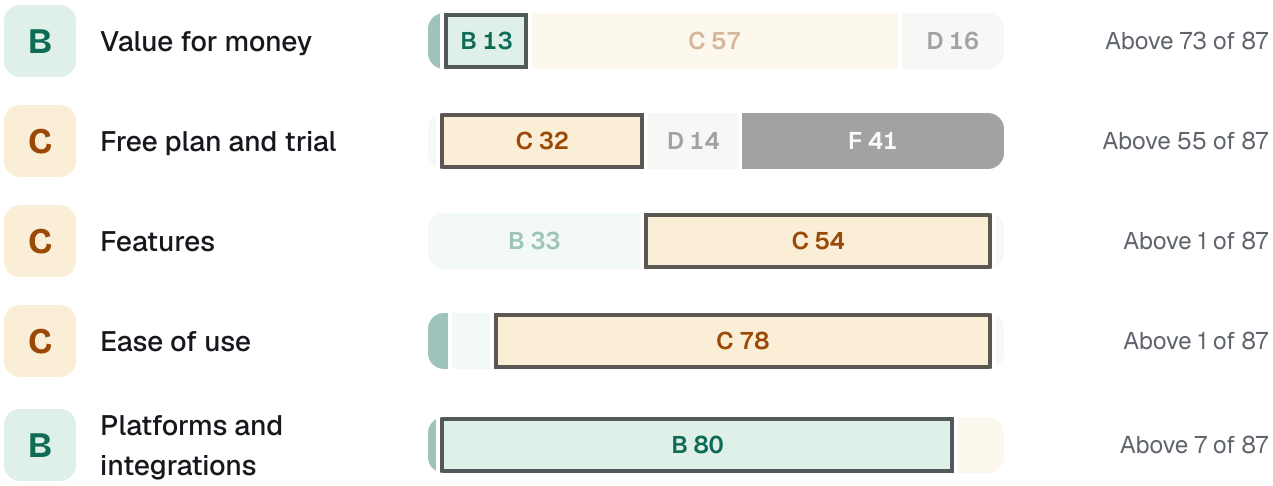

Other field service apps it is graded above

WorkGuru's GPA of 2.4 is higher than 68 of the 87 other field service apps we grade, and level with 9.

It stands best on value for money (B, above 73 of 87) and worst on features (C, above 1).

Each grade against the category

Every bar is all 88 field service apps we grade, cut by the letter each got. WorkGuru's own letter is outlined.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace WorkGuru you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.4 is higher than 68 of the 87 other field service apps we grade.

What you could make

- Job scheduling, quotes and estimates, invoicing, inventory, reports and forms: an app builder makes these well.

What you could not

- Connections to other products, each kept working as those products change.

What this rests on. WorkGuru's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
