Keep it

The plain part of Workstatus you could make: time tracking, time off, kanban boards, Gantt & timelines and reports. What surrounds it you could not. The 4 things listed below take a company, not a weekend.

It costs $84 a year.

What you could make

- Time tracking, time off, kanban boards, Gantt & timelines and reports: an app builder makes these well.

What you could not

- Clocking in from a phone, checked against where and when.

- A rota the whole staff sees on their phones, with swaps and alerts.
- Apps for macOS, Windows, Linux, iOS and Android that stay in step with each other.
- It is priced for each person, which means accounts and billing for a team.

What this rests on. Workstatus's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
