Welcome

What it is, who it suits, its grades and the ten things to know first

3.0

GPA, above 100 of the 122 other email apps we grade

Yandex Mail is the email service of Yandex 360, a bundle that also covers Disk storage, Documents, Calendar, Notes and Telemost video calls. The free plan includes the mailbox with ads and 5 GB of Disk space. Paid Personal and Family plans add storage, remove ads and unlock a smart assistant in Mail.

To get you started, here are **9 things to know about Yandex Mail**, taken from its own pages and our grades.

3 **There is a free plan**

4 **It runs on Web**

5 **Spam and virus protection**

Yandex describes the mailbox as protected from spam and viruses, with a block list and white list you manage yourself.

6 **Mail from other accounts**

7 **IMAP and SMTP access**

Any email client that supports IMAP and SMTP can connect, and OAuth sign-in is recommended where the client offers it.

8 **A 3.0 GPA, above 100 of 122**

That is against the other email apps we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Yandex Mail you would be making an email client: sending, receiving, threading and searching years of mail. That is not a weekend's work, with an AI app builder or without one.

PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

100/122

Other email apps it is graded above

Yandex Mail's GPA of 3.0 is higher than 100 of the 122 other email apps we grade, and level with 15.

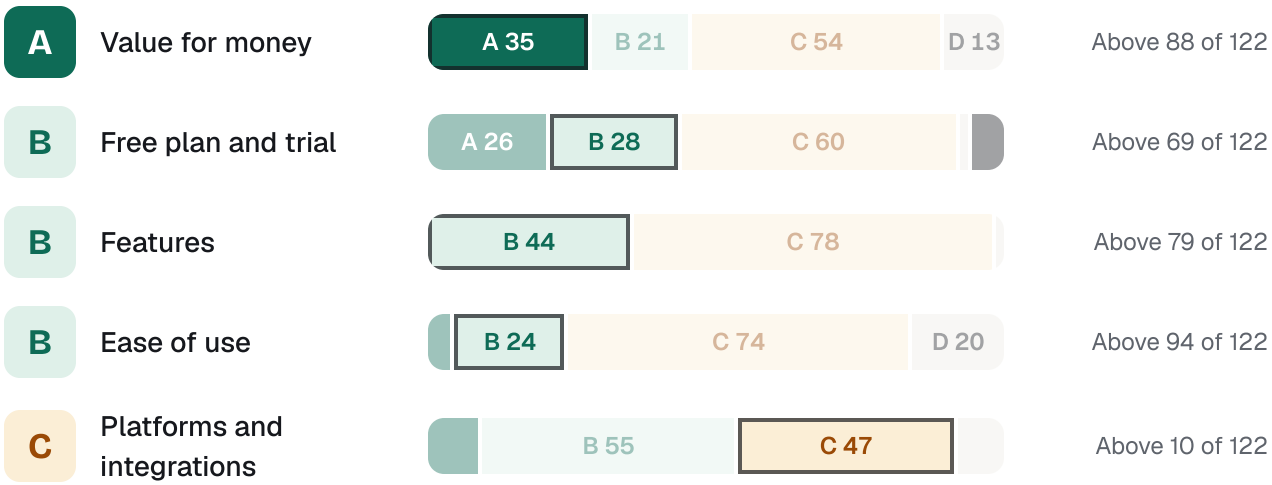

It stands best on value for money (A, above 88 of 122) and worst on platforms and integrations (C, above 10).

Its paid plans start at $2.42 a month, against a middle price of $4.92 for the category: 14 of the 76 others that charge start lower.

On features, ease of use and platforms it scores 2.7 out of 4. 2 tools score higher and cost less.

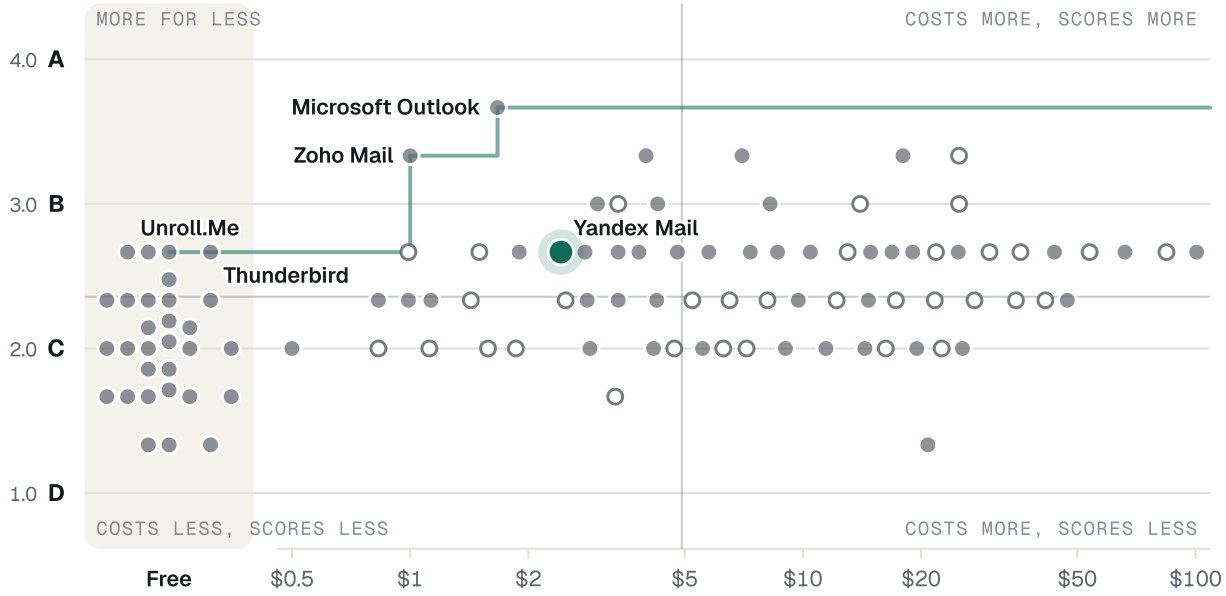

Each grade against the category

Every bar is all 123 email apps we grade, cut by the letter each got. Yandex Mail's own letter is outlined.

Price against what you get

Each dot is one of 107 email apps. Further left costs less; higher up scores better on features, ease of use and platforms. Yandex Mail is the marked dot.

What paid plans start at, a month (each step along is roughly double) ⍰

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Yandex Mail you would be making an email client: sending, receiving, threading and searching years of mail. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 3.0 is higher than 100 of the 122 other email apps we grade. It costs $29.04 a year.

What you could make

- Calendar and documents: an app builder makes these well.

What you could not

- An email client: sending, receiving, threading and searching years of mail.

- Storing and serving files for other people.
- It plugs into other products, Yandex Disk, Yandex Documents and Yandex Telemost among them.
- AI features, unless you pay a model provider for each request yourself.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Yandex Mail's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
