Where it stands

Its grades against its category, and whether to keep it or make your own

120/149

Other project management tools it is graded above

Yodiz's GPA of 2.8 is higher than 120 of the 149 other project management tools we grade, and level with 11.

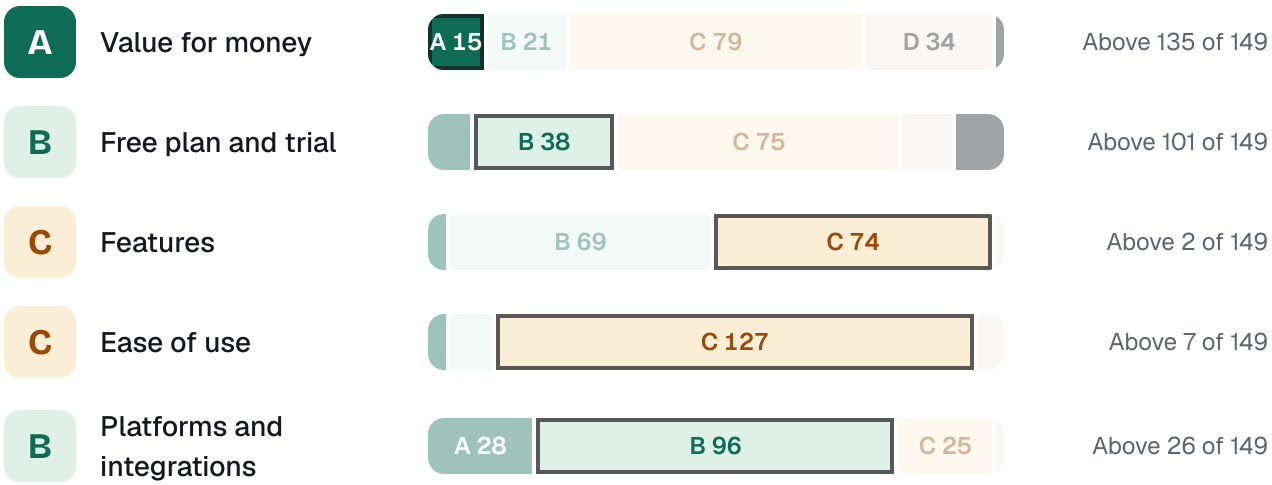

It stands best on value for money (A, above 135 of 149) and worst on features (C, above 2).

Its paid plans start at $3 a month for each person, against a middle price of $9 for the category: 3 of the 121 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 1 tool scores higher and costs less.

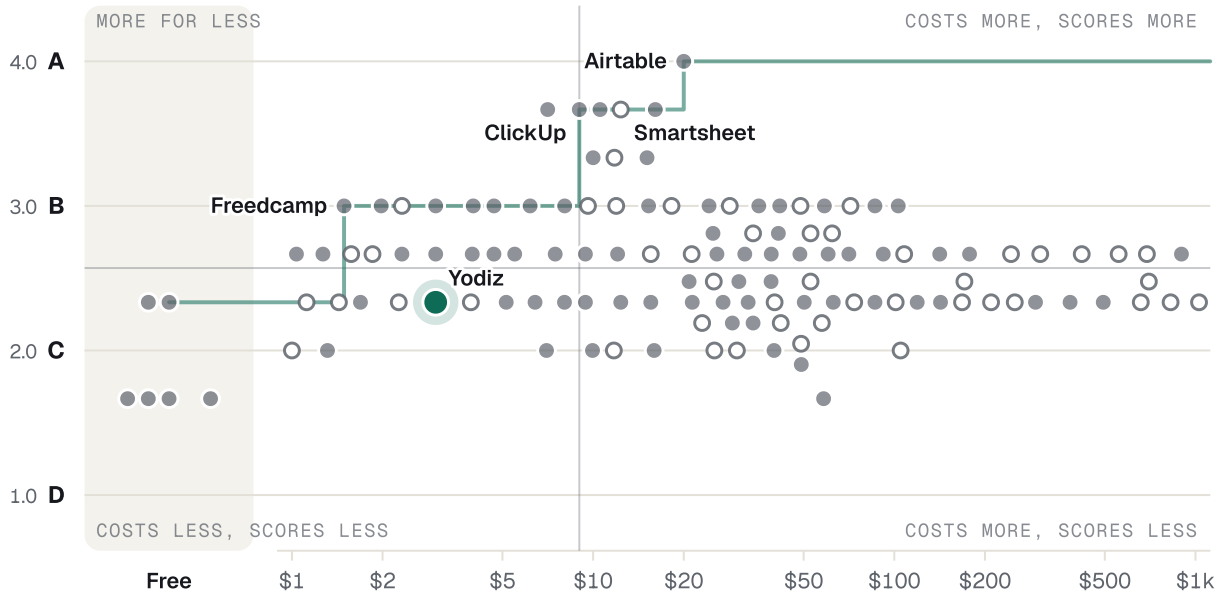

Each grade against the category

Every bar is all 150 project management tools we grade, cut by the letter each got. Yodiz's own letter is outlined.

Price against what you get

Each dot is one of 128 project management tools. Further left costs less; higher up scores better on features, ease of use and platforms. Yodiz is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

The plain part of Yodiz you could make: issue tracking, Gantt & timelines, time tracking and reports. What surrounds it you could not. The 3 things listed below take a company, not a weekend.

It is one of the better ones too: its GPA of 2.8 is higher than 120 of the 149 other project management tools we grade. It costs $36 a year.

What you could make

- Issue tracking, Gantt & timelines, time tracking and reports: an app builder makes these well.

What you could not

- A real app for iOS and Android. Something home-made would be a web page.
- It is priced for each person, which means accounts and billing for a team.
- It plugs into other products, Slack, GitHub and Bitbucket among them, and has an API.

What this rests on. Yodiz's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
