PART 04 · STANDING

Where it stands

Its grades against its category, and whether to keep it or make your own

18/136

Other writing tools it is graded above

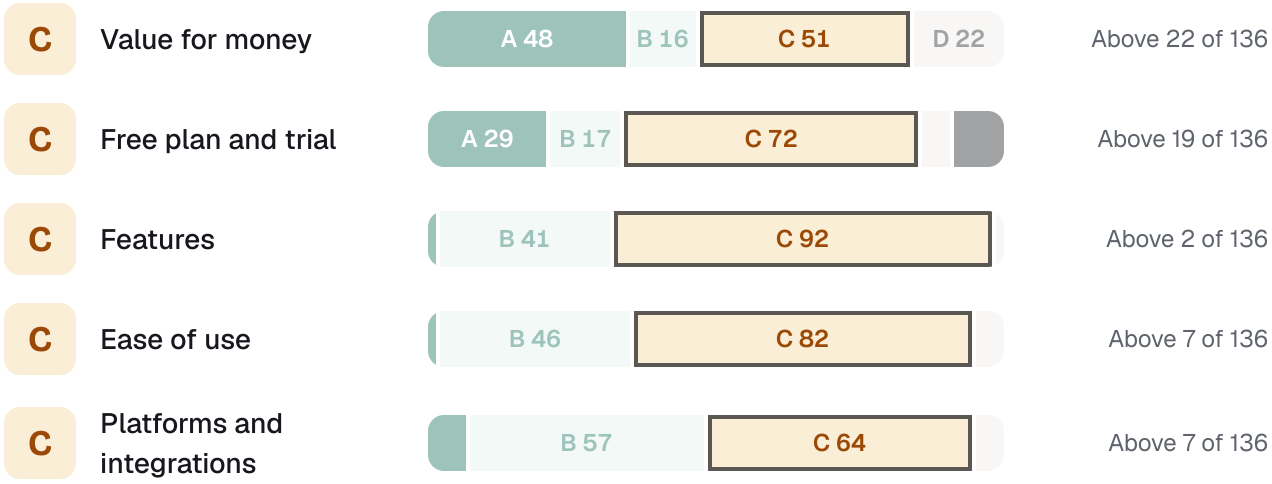

Yomu AI's GPA of 2.0 is higher than 18 of the 136 other writing tools we grade, and level with 16.

Its paid plans start at $10 a month, against a middle price of $8.66 for the category: 47 of the 81 others that charge start lower.

On features, ease of use and platforms it scores 2.0 out of 4. 44 tools score higher and cost less.

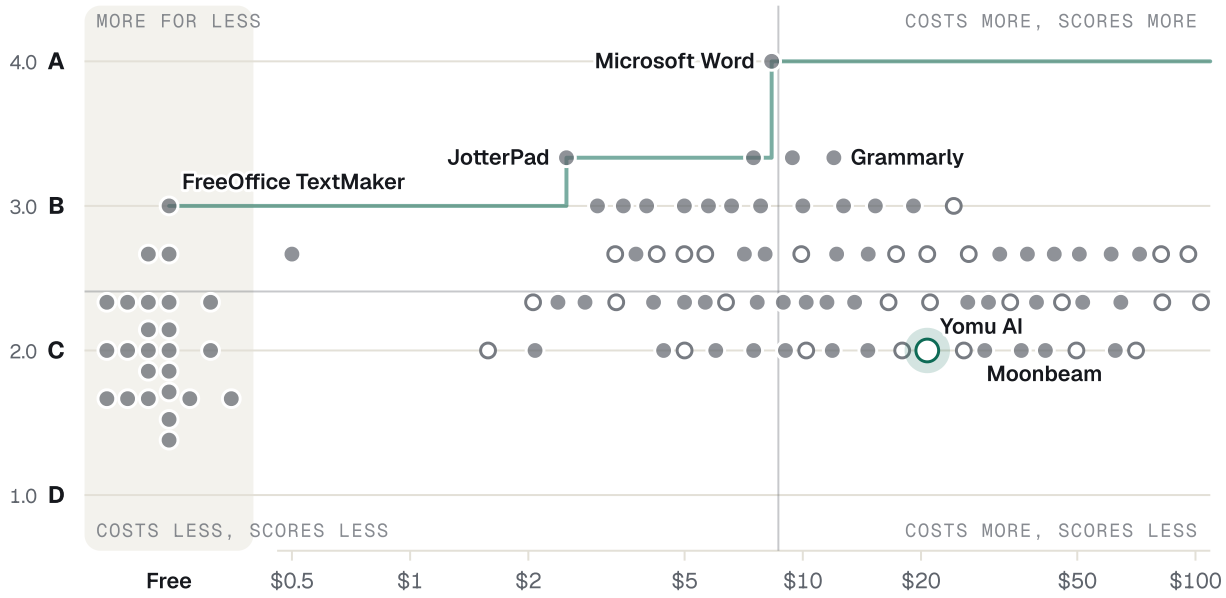

Each grade against the category

Every bar is all 137 writing tools we grade, cut by the letter each got. Yomu AI's own letter is outlined.

Price against what you get

Each dot is one of 107 writing tools. Further left costs less; higher up scores better on features, ease of use and platforms. Yomu AI is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Yomu AI you would be making an AI model, which you can rent by the request but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 102 of the 136 other writing tools grade higher. It costs $120 a year.

What you could make

- Long-form writing: an app builder makes this well.

What you could not

- An AI model, which you can rent by the request but not make.

	× Citation records for millions of papers.

What this rests on. Yomu AI's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
