It stands best on features (B, above 57 of 78) and worst on ease of use (C, above 3).

Every bar is all 79 e-signature and proposal tools we grade, cut by the letter each got. Youtrust (Yousign)'s own letter is outlined.

Price against what you get

Each dot is one of 55 e-signature and proposal tools. Further left costs less; higher up scores better on features, ease of use and platforms. Youtrust (Yousign) is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Youtrust (Yousign) you would be making connections to other products, each kept working as those products change. That is not a weekend's work, with an AI app builder or without one.

It is one of the better ones too: its GPA of 2.4 is higher than 58 of the 78 other e-signature and proposal tools we grade. It costs $120.66 a year.

What you could make

- Documents and templates: an app builder makes these well.

What you could not

- Connections to other products, each kept working as those products change.
- What a company asks for before it lets staff use something: single sign-on, SCIM and roles and permissions.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Youtrust (Yousign)'s listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
