Welcome

What it is, who it suits, its grades and the ten things to know first

2.0

GPA, above 31 of the 168 other AI image and video generators we grade

Zebracat generates finished videos from a prompt, script, link or image, with AI visuals, voiceover, music and captions. It can pick between AI video models such as Veo, Kling and Seedance per scene, and publishes to TikTok, Instagram and YouTube. Plans are priced by videos a month and by animation credits.

To get you started, here are **9 things to know about Zebracat**, taken from its own pages and our grades.

> "
>
> **You write the prompt and then edit the result, so there's a short learning curve.**

From our grade for ease of use

1 **Best for finished short videos from a prompt or link**

The homepage and pricing page disagree on the free plan.

2 **Paid plans start at $23 a month**

As its pricing page puts it: $23 per month, billed yearly ($39 billed monthly).

3 **You can try it first**

Homepage offers a free trial, no card required; the pricing page lists no free plan.

4 **It runs on Web**

Web.

5 **Prompt, link or image to video**

Builds a complete video with script, AI images, voiceover and captions from text, a link or one photo.

6 **Multiple AI video models**

The pricing page names Seedance, Kling, Veo and Gemini Omni, and says Zebracat picks a model for each scene.

7 **Credits only for animation**

Voiceovers, AI images, scripts and posting do not use credits; credits are spent on animating scenes with AI video models.

8 **A 2.0 GPA, above 31 of 168**

That is against the other AI image and video generators we grade, on value, the free plan, features, ease of use and platforms.

9 **Keep it**

To replace Zebracat you would be making a video model, which you can rent by the second but not make. That is not a weekend's work, with an AI app builder or without one.

The report card

Best for finished short videos from a prompt or link

Zebracat makes finished videos from a prompt, link or image, with voiceover, music and captions, and publishes to TikTok, Instagram and YouTube. Plans start at $39 a month, or $23 if you pay for the year, with avatars, voice clones and translation held back for dearer plans. The homepage and pricing page disagree on the free plan.

TOOLGPA REPORT CARD	Zebracat	Graded Nov 13, 2026
SUBJECT	GRADE	COMMENT
Value for money	D	$23 a month on yearly billing, or $39 monthly, against $21.62 where the dearest tenth of AI image and video tools starts. The cheapest plan is 15 videos a month.
Free plan and trial	C	A free trial with no card on the homepage, but the pricing page lists no free plan and doesn't say what the trial covers.
Features	C	Prompt, link or image to video, several video models, avatars, voice clones and publishing. Custom avatars and translation need Super Cat, and API access is Enterprise only.
Ease of use	C	No rating on record. You write the prompt and then edit the result, so there's a short learning curve.
Platforms and integrations	B	Web, with publishing to three networks and ChatGPT and Claude integrations. API access is Enterprise only.
Grade point average		Fair, out of 4.0 **2.0**

An A is worth 4 points, a B 3, a C 2, a D 1 and an F nothing. The GPA is the average of the five.

Who Zebracat is for

- ✓ Fits if you post a few videos a week and want the voice and captions done for you
- ✓ Works for marketers who want ads and explainers without filming

Who it is not for

- ✕ Pricey if you pay monthly: $39 for 15 videos, $99 for 40
- ✕ Watch out: avatars, voice clones and translation start on Super Cat at $59 to $99 a month
- ✕ Skip it if you need the API, since it's Enterprise at $599 a month and up
- ✕ Not for you if you want videos over a few minutes: 10-minute videos need Unlimited Cat
- ✕ Watch out: the homepage shows a Free plan and different prices than the pricing page

Good to know

Good for

- ✓ Marketers and creators who post video daily
- ✓ Agencies that need several brands in one account (Unlimited Cat)
- ✓ Teams that want AI video generation without managing separate model accounts

Worth knowing

- ⓘ The cheapest plan includes 15 videos and 350 animation credits a month.
- ⓘ Custom avatars, voice clones and video translation start on Super Cat; unlimited brands and 10-minute videos need Unlimited Cat.
- ⓘ The homepage shows a Free plan and different prices than the pricing page, so check the sign-up screen for current terms.
- ⓘ API access is listed only on Enterprise.

Where it stands

Its grades against its category, and whether to keep it or make your own

31/168

Other AI image and video generators it is graded above

Zebracat's GPA of 2.0 is higher than 31 of the 168 other AI image and video generators we grade, and level with 31.

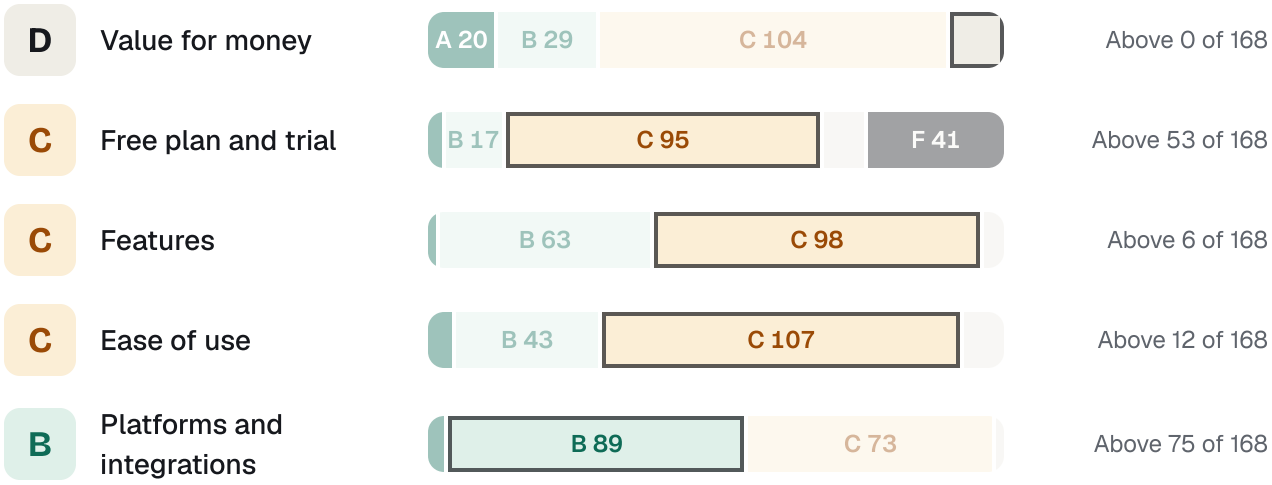

It stands best on platforms and integrations (B, above 75 of 168) and worst on value for money (D, above 0).

Its paid plans start at $23 a month, against a middle price of $11.88 for the category: 103 of the 120 others that charge start lower.

On features, ease of use and platforms it scores 2.3 out of 4. 45 tools score higher and cost less.

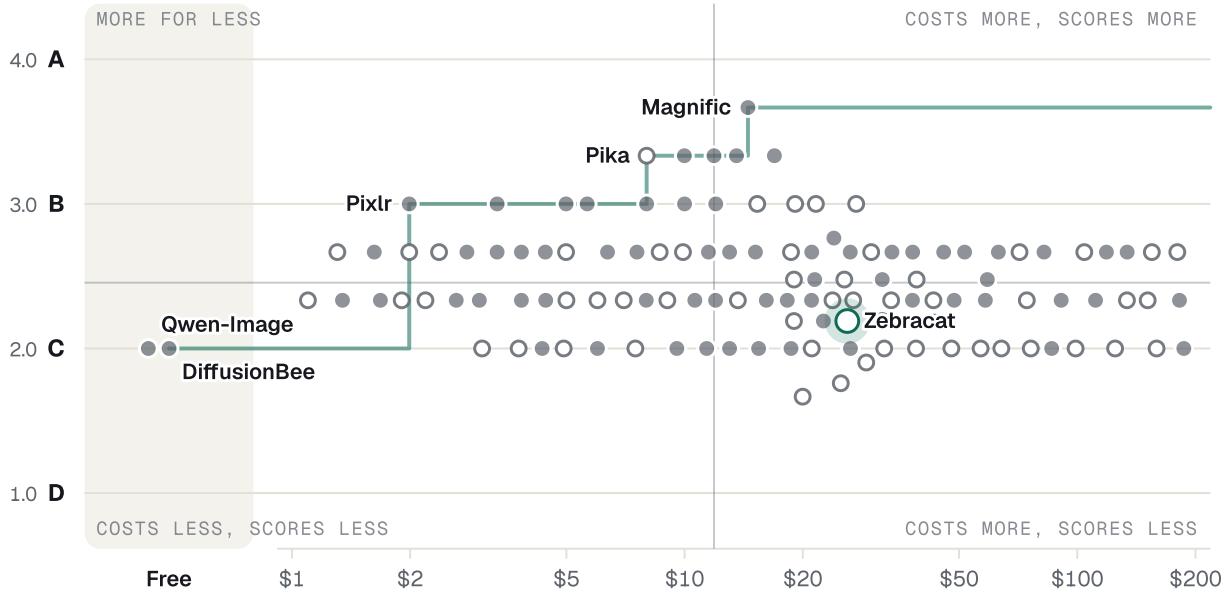

Each grade against the category

Every bar is all 169 AI image and video generators we grade, cut by the letter each got. Zebracat's own letter is outlined.

Price against what you get

Each dot is one of 123 AI image and video generators. Further left costs less; higher up scores better on features, ease of use and platforms. Zebracat is the marked dot.

What paid plans start at, a month (each step along is roughly double)

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Zebracat you would be making a video model, which you can rent by the second but not make. That is not a weekend's work, with an AI app builder or without one.

That makes this kind of software worth paying for, not this one in particular: 106 of the 168 other AI image and video generators grade higher. It costs $276 a year.

What you could not

- ✕ A video model, which you can rent by the second but not make.
- ✕ A voice model, which you can rent by the minute but not make.

- ✕ A voice model trained on your recordings.
- ✕ It plugs into other products, TikTok, Instagram and YouTube among them, and has an API.
- ✕ AI features, unless you pay a model provider for each request yourself.

What this rests on. Zebracat's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
