To get you started, here are **8 things to know about Zenventory**, taken from its own pages and our grades.

Keep it, or make your own?

Whether this is something you could build for yourself with an AI app builder, and what you would give up.

Keep it

To replace Zenventory you would be making discounted carrier rates and labels, which take an agreement with each carrier. That is not a weekend's work, with an AI app builder or without one.

It costs $5,988 a year.

What you could make

- Inventory: an app builder makes this well.

What you could not

- Discounted carrier rates and labels, which take an agreement with each carrier.

- Data from Amazon's seller tools and years of sales estimates.
- It plugs into other products, Amazon, Shopify and Walmart among them, and has an API.
- The depth: we grade its features B, which means it covers the whole job.

What this rests on. Zenventory's listing: what it does, where it runs, what it plugs into and what it costs. It is a judgement about the kind of software this is. We have not built a replacement for it, and making your own means looking after it too. How we decide, and every tool's verdict.
